

We can only trust that the hunting public takes the time to (1) read the firearms manuals and safety booklets packaged with their guns, (2) familiarize themselves with the features on their guns, and (3) use their guns in a safe and responsible manner. That is the only way to reduce hunting accidents.

It is always a pleasure to receive letters from outdoor enthusiasts like yourself, and we hope all of your future hunting experiences are rewarding.

Sincerely,

J.A. Stekl, Specialist
