In consideration of the extremely hazardous conditions which I was exposed to due to this malfunction, I can only say that It is very fortunate that both my friend and I are experienced hunters, having hunted all over the world for many, many years. At no time have I or my gunsmith been alerted to this problem potentially occurring in the BDL 700 actions and I feel that because of the neglect of your company I am due the reimbursement of the costs of my failed hunting trip.

Sincerely,

Ambassador Albert B. Fay
