In one instance the rifle fired when the safety was released. In another instance it fired when the bolt was closed.

MAIN FAULT: Unable to duplicate either of the above complaints. The rifle and trigger assembly operated properly in every respect, and could not be made to malfunction.

Trigger pull 3½ pounds; sear lift .0105"

COMMENTS: Offer the option of returning the rifle as-is, or of replacing trigger assembly at ½ normal cost as a gesture of good will, if that may better restore confidence in the rifle.
