1) Extractor showing brass
2) rifle fired when safety was moved off

MAIN FAULT 1) Edges of extractor appear to be sharp & showing brass off edge of case rim
2) Cannot duplicate accidental firing complaint — trigger assembly, safety operate properly in every respect.

Trigger pull 4 3/4 pounds; sear-lift .012"

PARTS

COMMENTS 1) check out extractor for proper operation
2) Offer to either return rifle as-is, or, we can install a new trigger assembly at 1/2 normal cost, as a gesture of good-will. I feel this will better restore customer confidence in the rifle.
