WOOD			C1	D3	E5	F5
METAL			C2			

When I cycled the safety button to fire, it flew without pulling trigger, cannot open bolt

MAIN FAULT: Upon receipt bolt opens and closes but due to rust in bolt and firing pin threads. Could not depress button of firing pin when the safe was selected. Ammunition did not cycle, extract, and trigger assy. Sear engagement seems has been worn out little caused from lack of maintenance

PARTS: Trig Fuel - 5/2.00 Bent Lf. 04 #26345 Trigger Assy.

COMMENTS: Repair Complete trigger assy & cycle test when action at 1/2 normal operation cost as gesture of good will.
