"Goes off when taken off safety"

MAIN FAULT: Mfgr. date 4/74 - Magazine Spring, Safety lever, Breech Bolt lightly Rusted. Customers concern resulted from insufficient sear engagement, caused by improper adjustment. Sealer on screws did not appear to be original factory sealer and fell off at the slightest touch. Sear engagement screw was tight in threads but turned in too much. Trigger Pull measured 1 to 1 1/2 LBS as need.

PARTS

COMMENTS: Replace trig. Assy at 1/2 price gesture of good will
