

May 4, 1994

I have already talked to a gentleman with Remington in ILION NY about this firearm. He sent me this box to ship my gun to you so you could test it. I wrote a letter after seeing the 60 MINUTE program about the REMINGTON 700. This rifle has misfired on me at least 4 times while taking the safety off. I was told by your representative that Remington would pay for the shipping and test my rifle. I have never had anyone to work on or tamper <sup>with</sup> the trigger-safety or the rifle in any way.

Please don't fire the gun several times in a short span of time. It is my understanding the heat generated by such a practice may possibly damage the barrel. Of course you are the manufacturer and would know more about that than I.

James H. CRAWFORD

Rt 2 Box 143A
