Correct me if I am wrong

I own a 6mm Remington-Model 600, A6252163.

Some years back, if I remember right you had some sort of recall on this rifle, because of pushing the safety forward the gun would fire. This is happening to mine

I would like to know if there was a recall of sorts and what I should do about it.

I have enclosed a stamped return envelope.

P.S. this rifle is great, that's why I want it back in top shape.
