

you.

While this rifle may not have been recalled, I believe the condition has existed since it was made and hope it is under warranty.

As you examine it, it may not "go off" when you first try it but I've had it happen as many as 3 times in a row. It seems like, for some reason, forward pressure on the safe sometimes causes the sear to drop.

I hope you can help me, because I've saved a long time and have wanted a rifle this nice for a long time.

Please contact me as soon as you can, and again, thank you very much.

Sincerely,
Jim Fluloy
