CUSTOMER'S REQUEST *less when safe is released - wants price to reflect*

MAIN FAULT *stainless steel libl - we do not reblu anymore trigger not moving freely - trigger assembly is contaminated with sticky substance - in addition, rifle has been dismantled outside of factory and improperly re-assembled - for plate assembly is not properly seated and is binding trigger.*

*Clean present trigger assembly, if possible, if not, give new trigger assembly at normal cost, as gesture of good-will. Properly re-assemble rifle at completion of above.*
