Dear Sirs:

On December 1, 1988 I was hunting deer in Duval County when my gun misfired. Fortunately, the only damage that resulted from this was a hole in the ground. However, I am very concerned about this gun. I need to be assured that this will not happen again. I bought my Remington 700 used in the summer of 1987. This is the only time that the gun has misfired. Please inform me as to what action I should take to restore confidence in my rifle.

← How "MISFIRE"?
