~~Charlie's Bait Shop~~

Dear Sir

On 7-27-81 I purchased a new Remington Model 700 RDL 270 Cal. Rifle, Serial # F6271808 from Charlie's Bait Shop in WConver, N.C. I noticed from the beginning the safety was hard to work and later that fall during hunting season I was unloading the rifle and when I pushed the safety to remove the cartridge from the chamber the fired. I returned the rifle to charlie's Bait Shop who shipped it back to the factory for repairs. The rifle was returned to me early this year and I was told the rifle had been repaired. ~~THE RIFLE COULD NOT BE REPAIRED AND WAS RETURNED TO THE FACTORY FOR A NEW RIFLE~~
The same thing happened again this season only this time the rifle fired through my new 1982 Ford Pick-up and my 1979 Ford car doing a lot of damage. I just feel lucky no one has been killed with this defected rifle. I have owned other Remington products and have been hunting for twenty years. I ask that you please replace this Rifle and compensate me for the damage it has done. I am sending a repair estimate per my phone conversation with Mr. Cole in the Customer Service Dept. on 11-29-82.

Sincerely

William K Millsaps
