DEAR DICK

TODAY I SPOKE WITH ROGER POTTER WHO ASKED ME TO MAIL YOU MY RIFLE
ALONG WITH EXPLANATION AS TO PROBLEM.
AS YOU CAN SEE THIS IS A REMINGTON 700 SERIES 30.06 #B6284337

FIRST OFF, I HAVE ALREADY PAID FOR IT TO BE REPAIRED AT A LOCAL GUNSMITH
BUT IT WAS UNSUCCESSFULL.

WHAT ACTUALLY HAPPENS IS OCCASIONALLY, SAY THE RIFLE IS COCKED AND ON SAFE.
NOW AND AGAIN WHEN I RELEASE THE SAFETY MECH BANG!!!!!!
THIS HAS ONLY HAPPENED 6 TIMES WITH ROUND IN CHAMBER BUT SCARY.
ON CHECKING THIS I FIND IT ALSO DOES THIS SOMETIMES EVEN THO THERE IS NO
ROUND IN CHAMBER. I MUST STRESS PATIENCE IS REQUIRED AS THIS DOES NOT HAPPEN
ALL THE TIME. CAN ANYTHING BE DONE? THIS LITTLE BABY OF MINE HAS ONLY
FIRED ABOUT 50 ROUNDS IN ITS CAREER.

ROGER ASKED ME TO LET YOU KNOW THAT I HAVE A JULY DRAWING COMING UP
AND IF POSSIBLE THE RIFLE RETURNED BY END JUNE.

I HAVE ALSO SENT ROGER INFO AND INVOICES WHERE I HAD IT REPAIRED.

IF YOU NEED TO SPEAK WITH ME OR NEED A BETTER EXPLANATION THAN I CAN PUT...
ON PAPER PLEASE CALL ME!

206 776-9184

yours

PAUL MITCHELL

P.S. WHEN I TOOK IT IN FOR REPAIR THEY SAID IT WAS
A SLIGHT TRIGGER ADJUSTMENT. THEN I ^{SAW} THE
LETTER IN THE NEWSPAPER AND DECIDED TO FOLLOW-UP.

THANKING YOU
