Remington Arms Co., Inc.
Arms Service Division
14 Hoefler Avenue
Ilion, NY 13357

To whom it may concern,

This weapon occasionally fires when the safety is removed. I had a gunsmith check it out. He could not find anything wrong. I went ahead and tried to use it but I was cautious of it. I fired it put the safety back on. When I went to unload it, it fired. Obviously, I'm afraid of the weapon.

Could you please look at it and see if you could find what is wrong with it. Please contact me regarding the cost of repair. Thank you.
