Dear Fred Supry:

The event are as followed. It was the morning of Dec 22, 2001 the temperature was 25° and the time was 6:45 A.M. I climbed into the deer house and sat down onto a cold metal chair. I took off my gloves to load the full magazine into the gun. The bolt on the gun was back at the time of loading. The magazine ~~clip~~ snapped into place. I then checked ~~the~~ the safety on the gun. The safety was on. I then pushed the bolt action into place. The bolt pushed the first round into place. I was ready to hunt. Being so cold out, I decided to see how loud the safety would be. The rifle is now being held with my left hand about 3 inches above the magazine. The butt of the is resting

PS00017

40361

on my left leg. The muzzle of the rifle is above my head a slightly tilted away from me. With my right hand, I moved the safety to fire. The rifle went off. At that time when the rifle went off, my right (should I say my fingers) were not on the trigger nor in the trigger guard. The rounds of ammunition that has been fired in this model 710 is Winchester super X 30-06 SPRG. 150. grain power point.

I know that gun safety should be practiced by everyone who handles a firearm, but unfortunately some become a statistic.

Accidents can be prevented by practicing Safety.

I went to the gun shooting range three prior times and shot approximately 60 rounds to sight in this rifle. I then went on a goat hunt and shot 4 rounds. I then returned to the gun range and shot 12 more rounds. When I chambered the 13th round of the day, I closed the bolt and the round went off by it self for the first time. I then fired three more rounds, and then the 17th round I chambered went off when I closed the bolt again for the second time. I then put the rifle in the gun case and went home.

This seems fine to me. It is very important that we comprehend that the rifle discharged, when you closed the bolt twice. Product service will make a detailed evaluation and we will determine what exactly has caused this to happen. I'll be waiting to receive your shipping receipt and I hope you are having a great day.

Thank you again,

Doug, here is the information that you will need:

1. Record the serial number of your firearm before sending it to us.
2. Pack your firearm for safety and to prevent further damage in shipping and handling. Preferably, ship in a firearm box, not a hardcase.
3. Remove all accessories from your firearm to prevent loss or damage. This would include scope, slings, or extra choke tubes.
4. Enclose a letter with the firearm detailing the model name or number of your firearm and serial number along with a full description of the problem. Be sure to include your full name and address (P.O. Box and Street Address), including zip code, daytime telephone number, and e-mail address.

Ship to:

Remington Arms Company, Inc.

Attn: Product Service

14 Hoefler Avenue

Ilion, NY 13357

I will call you when we receive this and have a chance to evaluate it. Please fax me your shipping info to the number below and I will get started on the credit. I would like to take this opportunity to tell you that I appreciate your patience with us during this situation and that we will resolve this issue. If you have any questions or problems, please feel free to give me a call.

Very sincerely,

Summer Kincaid

To: Dennis Sanita

I bought a Remington 270 in October 03 at D&G's sports center in Glasgow MT. I sighted the rifle in, and shot one doe reloaded just in case I saw a buck. I walked back to my house put the gun in the Jeep. Went in the house and got my wife, so we could go get the doe I shot. I got in the Jeep, reached over and opened the bolt to unload, and it (gun) went off, and we threw the floor board. (The estimate is enclosed) I took apart the gun and both trigger screws were coming out, intact one screw fell out. So I tightened them up so I wouldn't lose them. I bought the rifle for the sole purpose of Deer season. I had to borrow one for my other Deer. I prefer Remington products, I've never had trouble before. Hopefully it's fixable, I really love the gun.

PS00047

In close I hope to be doing future business with your company. I still need more guns. Please enclose a catalog of new guns. Thanks for everything.

RE: Remington Model 710 with scope recall, and resulting misfire thereof

Dear Mr. Madison,

I do appreciate you returning my call today, Monday, November 10, 2003. I would like to repeat what I stated over the phone. The safety was on. My friends can attest to that, they are the ones that sighted in the Remington Model 710 .270 caliber for me. I picked up the gun by the stock itself, and it fired. I was in shock. I can remember seeing pieces flying from the bed of Jimmy's Dodge pick-up truck, and I thought, "Oh God, I'm hit". It is a diesel model, long bed. The shell hit at an angle denting Jimmy's pick-up bed, and tearing a rubber bed liner, as I was lifting the firearm, and the round fragmented into several parts. Part of the round went into Jimmy's toolbox, leaving a hole, and denting the lid from the inside. Another splinter went through the front of Jimmy's pick-up bed, and went through the rear of the cab again. From there it appears to have splintered once more. It seems that part of this latter fragment is lodged in the rear seat of Jimmy's pickup, and the other fragment from this went upwards and out his rear split windshield. The gun recoil also caused me to sustain an open wound to my forehead, as enclosed, that required treatment at the nearby hospital in Taylorsville, NC. I have steri-strips that are to be worn through at least Friday, November 14, 2003, on my forehead right between my eyes of all things. At that time, Doctor Wilson will again see me as today during a follow-up (diagnosed concussion), clean the wound on my forehead, and redress at that time as enclosed. Doctor Wilson also gave me sample medication for this. I am furnishing you with the papers that I have at present. It may be some time before I get anything from Frye Hospital in Taylorsville, NC.

Also as I stated to you on the phone, from the day I got this model 710 out of layaway at Castle Sports Unlimited in Granite Falls, NC, I did not like how the trigger felt, or operated. The trigger is VERY touchy, nor does the safety feels right. Jimmy, and my friend John, noted this as well. It is also unfortunately noticed, this gun fires with the safety on, as well as off. I've been around guns all of my life and this has left me in shock, as well as that of my friends. I am a proud life member of the NRA. All I want is for things to be made right as you stated on our phone conversation. That is as follows as we talked of:

PS00058

Requested and discussed

My gun repaired, the stock reblued from the fragmentation, and the necessary repairs/replacements made not just to my Remington Model 710, but for Jimmy's truck to be repaired, and I am trying to reach him through John, at 828-234-1145 (cell number), or home at 828-313-0988, (I do not know Jimmy's number, but John does, and Jimmy is to be getting the actual estimates to me), and finally, those medical bills for me paid and refunded that I have paid so far. If any reimbursement for mental harm is paid, that is your call here (from resulting dizziness, headache, pain from the hit, steri-strips w/medications and medical visits), but I would so love to have a "Real Tree Hardwood Stock TM" on it, and I would pay for it only if it absolute need be the case. I just ask that you work with me, since I have been on disability for right near 2 years now if I "may" have to pay for this replacement stock (in all honesty, the standard machine tool gray stock is butt-ugly). I am a very fair individual to work with Mr. Supry, and I am not one to be "sue happy". I just want things here to be made right, nothing more. I understand well things go wrong at times. Personally, I hate these anti-gun lobbyists, which try to take away our 2nd Amendment Rights as outlined in the Constitution of the United States of America. What a bunch of morons they are for not truly understand the 2nd Amendment, if it wasn't for a well armed military, and public, then our great country may have very well been invaded ages ago. God Bless America!

Well, I've said all I have to say here. I hope you understand what I am trying to say here. This is what happened. Finally, I hope Remington continues to manufacture quality firearms now, and in the future, plus supports organizations such as the NRA.

Sincerely,

Bryan K. Turner

Dear CEO & Mr. Supry,
Mr. Supry has been a very
nice individual to talk with.
Please understand that neither
myself, John, or Jimmy are
upset at present... just shocked.
All we ask is that damages be
made right from defect in
the Model 270 Rifle not only
to myself, but to Jimmy's
pick-up/Toolbox as well, and
repairs of my rifle as I noted
on this page. Thanks for
being so understanding. I
did mail a copy of this letter.

Sincerely,

Bryan Turner

RE: Remington Model 710 with scope recall, and resulting misfire thereof

Dear Mr. Supry,

I do appreciate you returning my call today, Monday, November 10, 2003. I would like to repeat what I stated over the phone. The safety was on. My friends can attest to that, they are the ones that sighted in the Remington Model 710 .270 caliber for me. I picked up the gun by the stock itself, and it fired. I was in shock. I can remember seeing pieces flying from the bed of Jimmy's Dodge pick-up truck, and I thought, "Oh God, I'm hit". It is a diesel model, long bed. The shell hit at an angle denting Jimmy's pick-up bed, and tearing a rubber bed liner, as I was lifting the firearm, and the round fragmented into several parts. Part of the round went into Jimmy's toolbox, leaving a hole, and denting the lid from the inside. Another splinter went through the front of Jimmy's pick-up bed, and went through the rear of the cab again. From there it appears to have splintered once more. It seems that part of this latter fragment is lodged in the rear seat of Jimmy's pickup, and the other fragment from this went upwards and out his rear split windshield. The gun recoil also caused me to sustain a open wound to my forehead, as enclosed, that required treatment at the nearby hospital in Taylorsville, NC. I have steri-strips that are to be worn through at least Friday, November 14, 2003, on my forehead right between my eyes of all things. At that time, Doctor Wilson will again see me as today during a follow-up (diagnosed concussion), clean the wound on my forehead, and redress at that time as enclosed. Doctor Wilson also gave me sample medication for this. I am furnishing you with the papers that I have at present. It may be some time before I get anything from Frye Hospital in Taylorsville, NC.

Also as I stated to you on the phone, from the day I got this model 710 out of layaway at Castle Sports Unlimited in Granite Falls, NC, I did not like how the trigger felt, or operated. The trigger is VERY touchy, nor does the safety feels right. Jimmy, and my friend John, noted this as well. It is also unfortunately noticed, this gun fires with the safety on, as well as off. I've been around guns all of my life and this has left me in shock, as well as that of my friends. I am a proud life member of the NRA. All I want is for things to be made right as you stated on our phone conversation. That is as follows as we talked of:

PS00085

My gun repaired, the stock reblued from the fragmentation, and the necessary repairs/replacements made not just to my Remington Model 710, but for Jimmy's truck to be repaired, and I am trying to reach him through John, at 828-234-1145 (cell number), or home at 828-313-0988, (I do not know Jimmy's number, but John does, and Jimmy is to be getting the actual estimates to me), and finally, those medical bills for me paid and refunded that I have paid so far. If any reimbursement for mental harm is paid, that is your call here (from resulting dizziness, headache, pain from the hit, steri-strips w/medications and medical visits), but I would so love to have a "Real Tree Hardwood Stock TM" on it, and I would pay for it only if it absolute need be the case. I just ask that you work with me, since I have been on disability for right near 2 years now if I "may" have to pay for this replacement stock (in all honesty, the standard machine tool gray stock is butt-ugly). I am a very fair individual to work with Mr. Supry, and I am not one to be "sue happy". I just want things here to be made right, nothing more. I understand well things go wrong at times. Personally, I hate these anti-gun lobbyists, which try to take away our 2nd Amendment Rights as outlined in the Constitution of the United States of America. What a bunch of morons they are for not truly understand the 2nd Amendment, if it wasn't for a well armed military, and public, then our great country may have very well been invaded ages ago. God Bless America!

Well, I've said all I have to say here. I hope you understand what I am trying to say here. This is what happened. Finally, I hope Remington continues to manufacture quality firearms now, and in the future, plus supports organizations such as the NRA.

Sincerely,

Bryan K. Turner

Dennis,
I have reviewed and inspected the 710 and could not find anything that would cause it to fire on closing. I was also not able to duplicate the claim. The gun is shipping today, to your attention.

Thanks
Mike

Dear Sir:

SUBJECT: REFUND OF MONIES DUE TO THE PURCHASE OF A DEFECTIVE MODEL 710
BOLT ACTION RIFLE.

The rifle you are receiving will fire when you attempt to load another cartridge into the chamber to ready it for the second shot. Since you cannot engage the safety after firing the weapon unless you open the bolt please use extreme caution. Thank you for refunding my purchase price of the firearm as I don't believe after my close call of severe injury I would enjoy hunting with even a supposed fixed version. Please mail refund to address on bottom of letter.

Thank you,

Robert Yochem

RE: Model 710 Concern

Dear Ron and Sherri,

We have examined and were unable to reproduce an accidental firing on the rifle that you returned. We intend to do additional testing with the rifle that you returned, in the meantime, we have ordered a replacement Model 700 rifle as we discussed.

I have also enclosed a release that needs to be signed, notarized, and returned to my attention to get you a check cut to cover the repair costs of your vehicle. Once we have the executed release, the paper work will be issued to get the check cut and sent directly to you.

Hopefully, this information will brighten your holidays. We apologize for the inconvenience but hope that our actions will keep you as loyal Remington customers.

Sincerely,

RE: Model 710 Concern

Dear Ron and Sherri,

We have examined and were unable to reproduce an accidental firing on the rifle that you returned. We intend to do additional testing with the rifle that you returned, in the meantime, we have ordered a replacement Model 700 rifle as we discussed.

I have also enclosed a release that needs to be signed, notarized, and returned to my attention to get you a check cut to cover the repair costs of your vehicle. Once we have the executed release, the paper work will be issued to get the check cut and sent directly to you.

Hopefully, this information will brighten your holidays. We apologize for the inconvenience but hope that our actions will keep you as loyal Remington customers.

Sincerely,

A handwritten signature in black ink, reading "Fred Supry". The signature is fluid and cursive, with a large, sweeping 'F' and a long, trailing 'y'.

Dear Mr. Supry:

On the first day of hunting in Pa, November 29, 2004, I was invited to my friend's farm to go hunting. When I loaded my rifle, model 710, serial number 71071994, I loaded the clip with four Remington 180 grain 30-6 shells. When I put the bolt forward and locked it down into place, it immediately discharged. I was standing on the driver side of my truck with the rear door opened. The bullet went through my gun case -- the seat of my truck - through the right hand side passenger door- then into the hillside. The truck door window shattered because of the impact to the door.

My friend Fred Miller was there and witnessed what happened. A few other hunters where at their trucks and it rattled everyone involved there. My rifle was recalled when I first purchased it from "Dicks" and return to me after app. two months before the 2002 hunting season .

You already have the estimate for fixing my 2004 Toyota Tundra Quad Cab from Ross Auto Body , New Kensington , Pa 15068 . We will also need to rent a car during the repairs because both my wife and I work.

I am returning the rifle to you with shipping label you sent me.

We also discussed that I could purchase a Model 700 rifle with scope and gun case to be able to hunt for the remainder of the hunting season, which was agreed upon that Remington would reimburse me par our phone conversations November 30 and Dec 2 , 2004

I really appreciate that you have helped me with this incident.

Sincerely

Sherri,

Thank you for your call addressing the concerns you have with shipping Ron's rifle back to us. I assure you that if the rifle gets lost in shipment or by us once we receive it that Remington will pay the estimate on the truck damage, the cost of the rifle, scope, and damaged gun case.

Once we receive the rifle, we will order the replacement rifle that Ron wants, and we will either install a scope or add money to the settlement to cover the scope, mounts, and gun case. We will contact you with the results of our examination. I know that you are both anxious to get the truck repaired and the rifle replaced, so I promise you that I will expedite the process on my end.

RE: Model 710 Concern

Dear Ronald,

We were sorry to learn of the unfortunate incident that you experienced while getting ready to go hunting. While the property damage is regrettable we are glad that no one was injured.

As we discussed, I have enclosed an ARS label for you to return the rifle to my attention. We will also need estimates on the repairs to your truck. Please include a note inside the shipping box with your name, address, telephone number, and a brief description of the incident. The inside note is important as sometimes the outside label gets damaged and we want to be sure that the rifle is logged in correctly. Also, mention that we agreed to exchange the rifle for a Model 700 rifle.

We apologize for the inconvenience.

RE: Model 710 Concern

Dear Ronald,

We were sorry to learn of the unfortunate incident that you experienced while getting ready to go hunting. While the property damage is regrettable we are glad that no one was injured.

As we discussed, I have enclosed an ARS label for you to return the rifle to my attention. We will also need estimates on the repairs to your truck. Please include a note inside the shipping box with your name, address, telephone number, and a brief description of the incident. The inside note is important as sometimes the outside label gets damaged and we want to be sure that the rifle is logged in correctly. Also, mention that we agreed to exchange the rifle for a Model 700 rifle.

We apologize for the inconvenience.

Sincerely,

Fred Supry

Keeping Industry in Motion

I bought this rifle about 1 1/2 years ago brand new. My wife was deer hunting with it when she said it fired when she took it off of safe. She is pretty sure her finger was not on the trigger (almost positive). I didn't see what happened but I would like you to check it out just make me feel better. Feel free to call her (Teresa) at 573-386-2216 — or if no one answers call 573-310-5434.

RE: Model 710 Concern

Dear Tate,

We have issued the paperwork needed to get a check for \$896.84 issued to you. It will be your responsibility to get payment to your friend for the damages to his truck. We have also ordered you a Model 700 SPS 270 caliber in exchange for the Model 710 rifle that you returned. You should receive the check in the next couple weeks. The rifle will be sent as soon as we get one from the warehouse.

One lesson to take away from this incident is to never have a loaded firearm in a vehicle or house. Anytime that you need to clear one make sure the muzzle is pointed in a safe direction and extra care must be taken if the firearm is jammed or has malfunctioned in any way.

Incidents like the one you experienced are very rare, so we hope that the rest of your shooting sports experiences are good ones.

Sincerely,

Fred Supry

Dear Mr. Supry.

Here is the rifle. What happened was I shot a deer, jacked another shell in & pulled the safety. Apparently, it was stuck & when I got in the truck I saw it & tried to put it on safety. I could not move it so I decided to eject the shell, as soon as I grabbed the bolt the gun went off. The trigger was stuck all the way back.

I just had my wife try to put the gun on safety & she could not do it, with the bolt in. After removing the bolt she could easily. It must be hanging somewhere with the bolt, it is too hard to pull back with the bolt in.

I have enclosed the estimate my friend got to have his truck fixed.

As far as rifles, I will be happy with whatever you decide, maybe a model 700 or 270 BDL or maybe a pump 270 either one will be fine.

Thank you

RE: Model 710 Accidental Discharge

Dear Tate,

We were sorry to learn of the unfortunate incident that you experienced with your new Model 710 rifle. We are certainly glad that no one was hurt. We understand that there is damage to the floor board of the truck.

As we discussed, I have enclosed an ARS label for you to return the firearm to my attention for examination. Please include a note inside the shipping package with your name, address, telephone number, and a brief description of the incident. The note inside is important as sometimes the outside label gets damaged and we want to be sure the rifle is logged in correctly.

We understand that you do not want this rifle or another Model 710. Include in the note what rifle you would be interested in. Once we complete our examination we will contact you to discuss our findings and to discuss how to resolve this concern. We apologize for the inconvenience this incident has caused.

Sincerely,

To Whom This may Concern

2-15-05

I called Remington Customer Service And Talked with Kay About The firearm THAT Accompany's This Letter. Here is A discription of what happened with this firearm.

My Son and A friend were returning from deer hunting and put their rifles (both were loaded) into his friends truck. They were standing outside the truck talking when this firearm discharged on its own resulting in a hole in his Transmission. The boys, ages 20 and 23 are very responsible and safe when using firearms. This discharge of this rifle on its own could easily have been more tragic. Upon their inspection of the rifle they found the safety was in the safe position. Why did this gun discharge?

I talked with another gun owner who has the same model firearm but in a different caliber. His firearm discharged in a similar manner as this one. His has already been repaired by Remington. My question is! How many of these model 710 firearms have had problems? Do you have a defective firearm that needs to be recalled before someone gets killed?

I own Three other Remington products and have used these for Thirty years with no problems until now. I am enclosing proof from The boys insurance company on damages to his Truck.

Would you please notify me upon inspection of this firearm. I really don't want this gun or a replacement just like it because I'll always wonder if it will malfunction again. If at all possible I would like Remington to pay all damages to the vehicle.

You may get in contact with me Monday thru Thursdays After 3:00 P.m.

Thank You,
Jerome Hammond

Please describe your problem: Gun fired without trigger being pulled and bolt not locked down. Bolt Action will not work with ammo. Bought box of Remington Core-Lokt and after picking up the empty brass, I found that 3 shells were 30-06. Those 3 shells shot through my rifle. Basically, I think this model is the worst Remington I have ever owned and would NEVER have another one like it. This gun is a total waste of my money.
