Firearms Care (Cleaning and Lubrication):

Brand of cleaning solution used: Hoppe's Power Solvent #9
How often do you clean the bore? (Months or Number of rounds) After use and before Storage
How often do you clean the action? (Months or Number of rounds) After use and before Storage
How often do you clean the trigger assembly? (Months or Number of rounds) After use and before Storage
Brand of lubricant used: Hopp's Lub. 0:1

Over

PS 7253

How often do you lubricate the bore? (Months or Number of rounds)	
How often do you lubricate the action? (Months or Number of rounds)	N/A
How often do you lubricate the trigger assembly? (Months or Number of rounds)	

Have you reviewed the cleaning and maintenance recommendations on our web site or in our owners manual?

[X] YES [ ] NO

Comments: This problem has nothing to do with lubrication but rather with a part with the safety. I believe this model was on Recall.

When was the last time that your firearm was serviced by a Remington authorized repairman/gunsmith?

What were the services performed? has been cleaned and stored many years due to safety problem. Replaced with Remington Cal 243 as primary hunting weapon. Remington 270 beautiful weapon and my first is sentimental reasons.

Ship your INSURED firearm by either UPS or Parcel Post to:

REMINGTON ARMS CO., INC

ATTN: Arms Service Divison
14 Hoefler Ave
Ilion, NY 13357

WARNING: DO NOT SEND LIVE OR SPENT SHELLS IN YOUR FIREARM OR IN THE SAME BOX WITH THE FIREARM. **THIS IS A VIOLATION OF FEDERAL LAW.** IF YOU FEEL YOU MUST SEND SPENT SHELLS PLEASE SEND THEM IN A SEPARATE PACKAGE AND INCLUDE NAME, ADDRESS (WITH ZIP CODE), TELEPHONE AND MODEL AND SERIAL NUMBER OF YOUR FIREARM.

:: Record the serial number of your firearm before sending it.
:: Pack your firearm for safety and to prevent further damage in shipping and handling. Preferably, ship in a firearm box. (Note: Original boxes may not be returned.)
:: Remove all accessories from your firearm to prevent loss or damage.
:: Provide a return address on both the outside and inside the box. Shipments without a proper return address will be refused.
:: Ship your INSURED firearm by either UPS or Parcel Post. Remington is not responsible for damage or loss during shipment, so you may elect to purchase insurance from your carrier.

Charge repairs will be processed using the following guidelines:

:: Repairs $75.00 and under will be completed and returned to you C.O.D. (To avoid C.O.D. Charges, please include your credit card number and expiration date with your gun)

:: For Repairs over $75.00, you will receive a written estimate detailing the nature of the repair, applicable taxes and shipping. You will have 30 days to approve the repair estimate. Repairs can be paid by check, money order, or credit card (American Express, Discover, MasterCard, or VISA). If you wish, you can expedite repairs over $75.00 by setting a pre-authorized amount that can be billed to your credit card.

BLM Progra

REDACTED

☐ I would like to receive future e-mail updates from Remington.

Please describe your problem: The rifle discharged as the bolt was moved to the forward position prior to rotation into the firing position. My son was unloading the rifle with his left hand on the forearm and his right hand operating the bolt. He had ejected 2 rounds without incident. But on the last round the rifle fired. When the rifle fired the bolt was driven back into his hand and there was black soot on the side of his thumb and index finger. The primer looks like a properly fired round. Please inspect this rifle for the cause of this incident and advise.

Customer says the gun fires when the safety is moved, when you open & close the bolt it goes off as if the trigger is pulled. Examination showed that the rifle has not been properly cared for, the trigger assembly is rusted causing the trigger to stick forward.

RE: 7 M M Magnum, Model# 700, Serial# B6733073

To Whom It May Concern:

Recently my wife purchased a new Remington model 700 for our anniversary, which was Nov. 13, 1987. Our deer season opened on Nov. 17th, so I took my new gun, had a scope mounted, sighted in, and was ready for deer season. I only needed five shots for sighting in, so I didn't get much of a feel for the action, but I noticed that the safety latch was hard to move on and off. When I loaded the gun on the 17th, the bolt was hard to close. Thinking that since it was a new gun and owning several Remington firearms, I did not pay much attention to the problem.

On the first day of hunting season I saw a nice buck, but when I started to push the safety off, I could not get the safety to go into the firing position. I had to use my hunting knife to pry the safety off, and by the time I got it off, the deer was gone. I came home and took the scope off and am sending the gun to you to fix or replace.

I have been a Remington owner for many years and this is the first time I have ever had a problem. I do not want to give up on Remington just because of one gun that has a few problems, and the problems are:

1. The safety does not work right.

2. It seems like the cartridge is not lined up with the barrel and it is too hard to lock the bolt.

3. Shell release plate has to much play or space. Dose not close tightly.

I hope that we can work this out, because I cannot go back to my friend that sold my wife the gun. He was doing me a favor and made no profit from the sale.

Sincerely,

James H. Taylor

TO WHOM IT MAY CONCERN:

ON 11/19/05 THE FIRST DAY OF RIFLE SEASON FOR WHITE TAIL DEER IN VIRGINIA I HAD A TROPHY BUCK COME WITHIN TWENTY YARDS. I HAD THE SAFETY OFF, AND WHEN I SQUEEZED THE TRIGGER ALL I HEARD WAS A SLIGHT CLICK. I TOOK MY EYE DOWN FROM THE SCOPE, AND BARELY TOUCHED THE SAFETY WHEN THE RIFLE FIRED. IF THIS WOULD HAVE BEEN IN SOME SITUATIONS WITH PEOPLE AROUND SOMEONE COULD HAVE GOT INJURED OR KILLED. NEEDLESS TO SAY THE DEER WENT BACK THROUGH THE WOODS. THIS WAS A BOONE & CROCKET DEER, SOMETHING YOU MIGHT SEE A COUPLE TIMES IN A LIFETIME

THIS IS THE SAME THING THAT HAPPENED IN 1986 WHEN THE GUN WAS NEW. I SENT IT BACK, PER REMINGTONS INSTRUCTIONS TO REMINGTON ARMS BRIDGEPORT,CONN. I DO NOT KNOW WHAT WAS DONE, BUT THE PROBLEM WAS NOT CORRECTED. I KNEW THAT THE SAFETY DID NOT WORK AS SMOOTH AS IT SHOULD, BUT I FIGURED MAYBE WITH NEW PARTS IT WOULD BE A LITTLE TIGHT. AFTER THE GUN FIRED ACCIDENTLY IN THE WOODS I COULD NOT MOVE THE SAFETY ON OR OFF. IT WAS FROZEN. THE HUNTER WITH ME COULD NOT MOVE IT. ABOUT ONE HOUR LATER WHEN I GOT HOME IT WAS WORKING. THE TEMPERATURE IN THE WOODS WAS IN THE FORTIES.

I HAVE TALKED TO A COUPLE GUNSMITHS THAT TOLD ME REMINGTON HAD PROBLEMS WITH THE SAFETY ON THIS MODEL. THE GUN SHOULD HAVE BEEN FIXED OR REPLACED IN 1986. WHO EVER CHECKED THE GUN DID NOT DO THEIR JOB, AND AS A RESULT THEY SENT A DANGEROUS, DEFECTIVE GUN BACK TO ME. THANK GOD NO ONE HAS BEEN HURT.

I HAVE BEEN A LOYAL AND SATISFIED OWNER OF SEVERAL REMINGTON FIREARMS FOR OVER FIFTY YEARS. I FEEL THAT REMINGTON WILL TAKE CARE OF THIS PROBLEM TO MY SATISFACTION, AND I BELIEVE THAT I OWE REMINGTON THE COURTESY TO HAVE THE OPPORTUNITY TO DO SO. I KNOW THE WARRENTY HAS EXPIRED, BUT THE PROBLEM WAS NEVER CORRECTED WHEN I SENT IT BACK IN EIGHTY SIX. THE GUN HAS NOT HAD MORE THEN TWENTY SHELLS FIRED THROUGH IT. I ONLY TROPHY HUNT, AND SINCE I AM SIXTY SEVEN YEARS OLD I WILL PROBABLY NEVER GET ANOTHER CHANCE AT A DEER OF THIS SIZE. HOWEVER WHOEVER ENDS UP WITH THIS RIFLE SHOULD HAVE THE CONFIDENCE TO BELIEVE THE GUN IS IN PERFECT WORKING CONDITION.

IF THE GUNSMITH WHO WORKS ON MY GUN WANTS TO GIVE ME A CALL I CAN EXPLAIN EXACTLY HOW THE GUN PERFORMED ON THAT DAY. A COPY OF THIS LETTER WILL BE SENT WITH THE GUN TO NEW YORK. THANK YOU, AND HAPPY NEW YEAR.

SINCERELY

JAMES H. TAYLOR

11/14/06-Richard Pierce was hunting with his M/700. He pulled the trigger, nothing happened. Put it back on safety, then back in fire position and gun fired. He's owned the rifle over 20 years. It's been in his family awhile. It hasn't been cleaned in awhile. He cleaned it & oiled it and used it the next day and it was ok. I encouraged him to send it in to be checked. He is aware of the Safety Modification Program. Sending ARS & x.

Bridgeport, TX 76426

Subject: Model 700 concern
RE: Case # 610

Dear Mr. Pierce,

We were sorry to learn of the unfortunate incident that you experienced while enjoying the shooting sports. My understanding of this incident is that the rifle fired when the safety was moved. We are certainly glad that you are ok and that you are anxious to get back to enjoying the shooting sports.

As we discussed, I have enclosed a prepaid shipping label for you to ship the rifle back to our factory for examination and repair. I have also included a copy of this letter to put inside the shipping box. The letter inside is important as sometimes the outside label gets damaged in transit and we want to be sure the rifle is logged in correctly. Please provide additional information about the incident, including the date of the last occurrence, type of weather, type of ammunition being used, etc.

We apologize for the inconvenience that this incident has caused; but, hope that our actions will keep you as a loyal Remington customer.

Sincerely,

Laura Watson

Re: Malfunctioning 700

Enclosed is our Remington 700 sniper rifle, which I spoke to Tom Nagle about. It seems that the trigger will fire upon closing the bolt and going from safe to fire automatically. I was told to return it for repair.

Thank you,

Mark F. Lewis
Range Master

To: FRED SUPRY
— We spoke on the phone. Safety won't engage w/ bolt closed. When bolt is open, safety works — put on safe, close bolt, push safety off — GUN GOES off (without touching trigger). You said you would install new trigger assembly free.
— Mark Polatty, 465 Hill Road, Green Lane, PA. 18054.

RE: 700 ML Concern
Serial #: ML093227

Dear Dan,

We were sorry to learn of the unfortunate incident that you experienced while enjoying a day of deer hunting. We are glad that your injuries were not more severe, and hope that your thumb has completely healed. Examination of the rifle found that the trigger assembly was rusted and dirty causing the trigger not to reliably return under the sear. As you know, when the trigger is not under the sear the rifle will fire on safe release. To correct that situation, we will install a complete new trigger assembly at no charge.

Along with all the extra care and cleaning required of a muzzle loading rifle, you will need to remove the stock periodically and clean and oil the trigger assembly – being careful not to over oil the assembly. One suggestion is after you have cleaned the rifle to thoroughly spray the trigger housing with a good gun cleaner, then blow out the mechanism to remove any sludge or rust, and then apply one of the new synthetic oils (a drop on each side of the sear). To test the sear movement; with the bolt out and that safety in the ready to fire position pull and hold the trigger rearward, then push down on the sear and release the sear – the sear should go down easily and return smoothly to its upright position. If the return movement is sluggish then the assembly needs cleaning. Next release the trigger and push down on the sear – the sear should be stopped from full downward movement by the trigger – if it bypasses the trigger then the trigger is not returning under the sear which indicates that the trigger is binding as the result of sticky residue or rust inside the housing and should be cleaned and oiled. If the problem still occurs after cleaning then the rifle should be serviced by a qualified gunsmith.

We apologize for the inconvenience that this incident has caused. If you have any questions feel free to contact me directly

Sincerely,

Fred Supry, Manager

New Text Document

Dear Remington Arms,

The reason that this gun needed to be returned is because it almost resulted in a serious injury or even death. Me and my brother-in-law were out hunting deer,and we ended up shooting this deer that was not yet dead so I loaded the gun again and went up to the deer,with my brother-in-law beside me, to finish the deer off.I went to disengage the safety, and in doing so made the gun fire,spilting my thumb wide open.Needless to say it scared us both to death.I took it to the range afterwords and it does the same thing every time.

RE: Model 700 Concern

Dear Paul,

We were sorry to learn of the unfortunate incident that you experienced; but, we are certainly glad that you were not seriously injured.

As we discussed, I have enclosed a shipping box and label for you to return the rifle to my attention for examination. Once you have estimates on the damages you can forward them to me at the address below. Please put a note inside the shipping box with your name, address, telephone number, and a brief description of the incident. The note inside is important as sometimes the outside label gets damaged in transit and we want to be sure the rifle is logged in correctly.

We will contact you upon the completion of the examination to discuss our findings, and to reach a mutually acceptable conclusion to this most unfortunate event. We apologize for the inconvenience that this incident has caused. We hope that our actions will keep you as a loyal Remington customer.

Sincerely,

Fred Supry, Manager

Ship your INSURED firearm by either UPS or Parcel Post to: **Remington Arms Co., Inc.** **Attn: Arms Service Division** **14 Hoefler Avenue** **Ilion, NY 13357** 11162 HWY One South Hill Va, 23970

WARNING: DO NOT SEND LIVE OR SPENT SHELLS IN YOUR FIREARM OR IN THE SAME BOX WITH THE FIREARM. **THIS IS A VIOLATION OF FEDERAL LAW.** IF YOU FEEL YOU MUST SEND SPENT SHELLS PLEASE SEND THEM IN A SEPARATE PACKAGE AND INCLUDE NAME, ADDRESS (WITH ZIP CODE), TELEPHONE AND MODEL AND SERIAL NUMBER OF YOUR FIREARM.

:: Record the serial number of your firearm before sending it.
:: Pack your firearm for safety and to prevent further damage in shipping and handling. Preferably, ship in a firearm box. (Note: Original boxes may not be returned.)
:: Remove all accessories from your firearm to prevent loss or damage.
:: Provide a return address on both the outside and inside the box. Shipments without a proper return address will be refused.
:: Ship your INSURED firearm by either UPS or Parcel Post. Remington is not responsible for damage or loss during shipment, so you may elect to purchase insurance from your carrier.

Charge repairs will be processed using the following guidelines:

:: Repairs $75.00 and under will be completed and returned to you C.O.D. (To avoid C.O.D. Charges, please include your credit card number and expiration date with your gun)

:: For Repairs over $75.00, you will receive a written estimate detailing the nature of the repair, applicable taxes and shipping. You will have 30 days to approve the repair estimate. Repairs can be paid by check, money order, or credit card (American Express, Discover, MasterCard, or VISA). If you wish, you can expedite repairs over $75.00 by setting a pre-authorized amount that can be billed to your credit card.

RE: Model 700 ADL concern

Dear Randolph,

We were sorry to learn of the unfortunate incident that you experienced while checking the function of your rifle. It is my understanding that you experienced an accidental discharge that resulted in some property damage.

As we discussed, I have enclosed an ARS label for you to return the incident rifle to my attention for examination. Once we complete the examination I will contact you to discuss our findings and to work toward a mutually acceptable conclusion to this most unfortunate event. The rifle will be logged in from and returned to your wife's work address as you requested. Please include your estimate of the damage for us to consider. I have enclosed a copy of this letter to put inside the shipping box. The letter inside is important as sometimes the outside label gets damaged in transit and we want to be sure the rifle is logged in correctly. Also, please add information related to the incident on the back of this letter. I'm looking for the date of the incident, how it came about, the amount of damage, etc.

We apologize for the inconvenience that this incident has caused; but, hope that our response will keep you as a loyal Remington customer. If you have any questions feel free to contact me directly.

Sincerely,

Repair Form

(NOTE: Please print and complete this form, and then include it with your firearm.)

Model Number: 700	**Serial Number:** A6406111
Name: Robert m. Reddish	**Date of Purchase:**
Address (no PO Boxes): 360 Oak Island Estates	
City: Jesup	**State:** Ga. **Zip:** 31545
Phone (Daytime): 912-427-8389	**Fax:**
E-mail Address:	

Please describe your problem:

Gun fired when the safety was moved to the fire position.

Additional Information: (Ammo type, brand, handload specifications, etc.)

NOTE: Prior to shipping your firearm, contact the Repair Center for services provided and estimated repair time.

WARNING: DO NOT SEND LIVE OR SPENT SHELLS IN YOUR FIREARM OR IN THE SAME BOX WITH THE FIREARM. **THIS IS A VIOLATION OF FEDERAL LAW.** IF YOU FEEL YOU MUST SEND SPENT SHELLS PLEASE SEND THEM IN A SEPARATE PACKAGE AND INCLUDE NAME, ADDRESS (WITH ZIP CODE), TELEPHONE AND MODEL AND SERIAL NUMBER OF YOUR FIREARM.

:: Record the serial number of your firearm before sending it.
:: Pack your firearm for safety and to prevent further damage in shipping and handling. Preferably, ship in a firearm box. (Note: Original boxes may not be returned.)
:: Remove all accessories from your firearm to prevent loss or damage.
:: Ship your INSURED firearm by either UPS or Parcel Post. Remington is not responsible for damage or loss during shipment, so you may elect to purchase insurance from your carrier.

E-mail Address: ☑ I would like to receive future e-mail updates from Remington.		

Please describe your problem and date of ocurrence:

While loading, the gun discharged. It was during a Co. elk hunting trip. The rifle was kept in the truck to avoid condensation. It was a very cold morning & the temp. in the truck was below freezing. I loaded the rifle with the safety on "fire". I was then unable to push the lever to "safe". With some "wiggling" the lever went to "safe". Wanting to see if the lever was still "frozen", I moved it back to "fire". When I moved it to "fire", it discharged. The trigger has been worked-see attachment

Trig. set screws altered. Sear cam altered. Replace TPA, check bolt, clean at 1/2 MSP.

Brand of lubricant used: rem-oil

How often do you lubricate the bore? (Months or Number of rounds) after each shooting

How often do you lubricate the action? (Months or Number of rounds) very infrequently

How often do you lubricate the trigger assembly? (Months or Number of rounds) never

Have you reviewed the cleaning and maintenance recommendations on our web site or in our owners manual? ☑ YES ☐ NO

When was the last time that your firearm was serviced by a Remington authorized repairman/gunsmith?) never

What were the services performed?)

NOTE: In order to better service our customers some firearms/parts are sent to a certified Remington Premier Authorized Repair Center.

Ship your INSURED firearm by either UPS or Parcel Post to:

Remington Arms Co., Inc.
Attn: Arms Service Division
14 Hoefler Avenue
Ilion, NY 13357

WARNING: DO NOT SEND LIVE OR SPENT SHELLS IN YOUR FIREARM OR IN THE SAME BOX WITH THE FIREARM. **THIS IS A VIOLATION OF FEDERAL LAW.** IF YOU FEEL YOU MUST SEND SPENT SHELLS PLEASE SEND THEM IN A SEPARATE PACKAGE AND INCLUDE NAME, ADDRESS (WITH ZIP CODE), TELEPHONE AND MODEL AND SERIAL NUMBER OF YOUR FIREARM.

:: Record the serial number of your firearm before sending it.
:: Pack your firearm for safety and to prevent further damage in shipping and handling. Preferably, ship in a firearm box. (Note: Original boxes may not be returned.)
:: Remove all accessories from your firearm to prevent loss or damage.
:: Provide a return address on both the outside and inside the box. Shipments without a proper return address will be refused.
:: Ship your INSURED firearm by either UPS or Parcel Post. Remington is not responsible for damage or loss during shipment, so you may elect to purchase insurance from your carrier.

Charge repairs will be processed using the following guidelines:

returned to you C.O.D. (To avoid C.O.D. Charges, please include your un)

en estimate detailing the nature of the repair, applicable taxes and air estimate. Repairs can be paid by check, money order, or credit card l. If you wish, you can expedite repairs over $75.00 by setting a pre- card.

(#618)
This person had the bottom of the Sear cam ground and polished where it contacts the trigger. Also when he put the TA back together he left out the safety detent ball.

Subject: Model 700 Serial #B6640324
RE: Case #700

Dear Mr. Stokes,

We were sorry to learn of the unfortunate incident that you experienced while shooting your rifle. We are certainly glad that there were no injuries, and that you are anxious to get back to enjoying the shooting sports.

As we discussed, I have enclosed a prepaid UPS shipping label for you to ship the firearm back to our factory for examination and repair. I have also included a copy of this letter to put inside the shipping box. (The box will come under separate cover). The letter inside is important as sometimes the outside label gets damaged in transit and we want to be sure the rifle is logged in correctly. On the factory repair form, please provide additional information about the incident, including the date of the last occurrence, type of weather, type of ammunition being used, etc.

We apologize for the inconvenience that this incident has caused and we hope that our actions will keep you as a loyal Remington customer.

Sincerely,

Laura Watson

Customer says he inherited the rifle. The rifle had not been used in about 5 years. He was in his Den and loaded the rifle, when he pushed the safety off the rifle fired shooting a hole through two walls and hitting a powder can. The rifle is a 1960s vintage Model 700 with a bolt lock safety.

Cost **Date**

10/26/2006 sent ARS label and letter to retrieve the rifle. The customer wanted to know how this could happen, told the customer that we would examine the rifle; but, after sitting for 5 years the oil could become sticky and the sear could stick to the sidewalls of the housing. Also, told the customer that the gun should have been cleaned and check prior to any attempt to use, and that a gun should never be loaded with live ammo inside the house. We agreed to clean the action and install a new TA at n.c and to check the rifle over, but the damages were up to him to take care of

Green Bay, WI 54313

RE: Model 700 Concerns

Dear Russ,

We were sorry to learn of the unfortunate incident that you experienced with the rifle that you inherited. As we understand it, it was a 1960's vintage Model 700 rifle and it discharged when you moved the safety to the off position. The resulting discharge caused damage in your house but no personal injury.

During our discussion today, we offered to examine, clean, inspect, and install a new non-bolt lock style trigger assembly in your rifle. Once we have completed our examination we will contact you to discuss our findings.

As we discussed, I have enclosed an ARS label, a return to factory only label, and a copy of this letter to return with the incident rifle. The letter inside the shipping box is important as sometimes the outside label gets damaged in transit and we want to be sure the rifle is logged in correctly. If you have any questions feel free to contact me directly.

Sincerely,

Fred Supry, Manager
Product Service and Law Enforcement Training
Remington Arms Company

PI						
PD	4-wheeler shot	Cause:4039	No Fault Found			
S		Concern:1007	Fired on Safe Release		Unknown	
C						

Customer claims that he laid the gun on the seat and when he moved the safety to the fire position the rifle fired shooting through the seat and frame of his 4-wheeler. This is the X-Mark Pro trigger assembly - we could not duplicate the concern, we found the TA to work properly. We feel that the trigger was contacted when the safety was taken off. Customer said he could not get the incident to repeat.

Attn: Fred Supry

On November 4, 2006, opening day of deer season, I parked my Mule and got out to walk to my deer stand. Since it was 5:00 a.m. and still dark, I decided to throw the safety off of my gun and carry it to the stand due to the large population of wild hogs in the area. The rifle was laying in the seat of the Mule and when I kicked off the safety the gun fired and shot through the seat and went through a seat brace. The shell splattered the gas tank with hot metal and passed very close to the tank itself. (See enclosed pictures.)

The gun is a Remington, model 700 Mountain LSS, cal. 270, serial S6568666. This was the first time the gun had been fired. It's brand new.

Thank you,

Dan Slack

DEPARTMENT OF THE TREASURY
BUREAU OF ALCOHOL, TOBACCO AND FIREARMS
ATLANTA, GEORGIA 30345-3104

Dear Licensee:

Enclosed you will find your Federal Firearms License.

If this is your first license, publications and an initial supply of forms which relate to the conduct of business as a federal licensee will be mailed from the ATF Distribution Center, P.O. Box 5950, Springfield, Virginia, 22150-5950. Upon receipt of the packet, please use ATF F 1600.8 to order additional forms. Please allow ten days for delivery of your packet. After reviewing the information, if you have questions or problems concerning recordkeeping requirements or other information, contact your local ATF Area Office or you may call the Licensing Center in Atlanta, Georgia at (866) 862-2750.

Note you have received only one original license. DO NOT SIGN THE ORIGINAL LICENSE prior to making copies, as the signature on each certified copy must be an original.

A Federal Firearms License does not permit you to receive, sell, or transfer firearms or ammunition without first obtaining the proper State and/or local license, if any. Please check with your local authorities.

To Whom It May Concern:

On December 11, 2005, while attempting to unload my Rem 700 30/06, the rifle discharged, nearly taking a human life, the life of my 10-year-old daughter. Now, before you lecture me on gun safety, as did your representative over the phone, it was very lucky that I was following the "10 Commandment". However, when I went to remove the chambered round, the mere action of moving the bolt handle caused the firearm to discharge. Now, after the shock and sudden heart stopping moment, quickly checking my daughter for bullet fragments (as ballistic tip bullets tend to do on contact with solid objects), I checked the rifle...it was on SAFE! I asked my daughter, who is as competent as most adults when it comes to firearms, if I had taken the rifle off safe and she said, "No!!!". So I took it to a gunsmith who informed me that I was lucky that I wasn't killed earlier or killed someone else and that the problem was in the rifle. He told me I should send it back to you.

Now, as a gun owner of several Remington's, as well as Rugers, Winchesters, and various military rifles, I do understand parts do have wear and tear, but quality rifles do not just go off. That is a severe design flaw...one that I didn't know about, even after buying several new Remington's. I have been to your website several times, even to check the date of manufacture on this rifle, only after this incident did I eventually find the "safety modification program" link. It is very deceptive and had I not had this incident, then I still would not have noticed the information...honestly, I believed it was for the new bolt lock mechanism. It doesn't mention anything about older Remington's, and when you click on the ad enlarge, it is unreadable.

I find this to be a lack of honesty on the behalf of Remington. Over the phone your representative blamed it on someone tampering with the trigger, age, an unclean rifle (oil and dirt in the trigger mechanism) and even hinted that it was somehow my fault.

During this year, I had planned to buy a custom shop rifle to commemorate the 100 year anniversary of the 30/06, a youth model Rem 700 ADL (a few can still be found) for my other daughter, as well as 11-87 auto shotgun. However, now I have misgivings about Remington products and wonder what possible "flaw" in the future may cause at the very least a missed opportunity on a trophy or the worst, a loss of life or injury. I suggest that Remington put a little more effort into letting the public know about this problem. Because without loyal customers and firearms enthusiasts to support hunting and sport shooting, plus the teaching of the next generation, there will be no gun industry.

Remington Arms Co., Inc.
Attn: Arms Service Division
14 Hoefler Avenue
Ilion, NY 13357

Dear Repair Manager:

I am returning my Rifle to you via the dealer "Shooter's Highland" located in Valatie, NY, for repair of a serious set of malfunctions occurring with my Remington model 700 Titanium/.308 (Serial number: TT003913).

On several occasions the rifle did not fire when the trigger was pulled; but when the bolt was lifted to eject the shell the gun then fired - obviously a very serious and dangerous problem that requires immediate attention. In addition, after ejecting the first fired round the second round jams the action upon entry - a condition which occurs almost every time I attempt to fire two rounds in rapid succession. The action is not nearly as smooth as it should be and it is very hard to work, leading me to believe these issues are all related to a defect which I, nor the dealer, have been able to identify.

This situation is very disappointing, because I own several other Remington products and have never had issue with any of them, but this will be the second time I have had to send this rifle back to you for service. It is very important that the problem with the action be identified and repaired so as to bring the rifle back to a condition where it can be fired safely and reliably.

Thank you in advance for your assistance with this matter.

Sincerely,

Peter Angelo

Attachment to Remington Factory Repair Instructions

For 700ML #ML215545, belonging to Richard P. Slabinski, 86 Drewsen Drive, Florence, MA 01062.

My Problem is:

When the gun is loaded and on safe, when you put it up to your shoulder and flip the safety off, the gun fires, without touching the trigger.
3 December 2005 in Vermont
24 December 2005 in Massachusetts

I would like the Trigger assembly replaced and any thing else you find even if it is a rusty head on a screw. (You have my credit card nr.)

Now comes the hard part, I am a Master Instructor for Hunter Education for the State of Vermont and Massachusetts (12yrs). I am running classes on the 21 & 22 Jan 06, 18 &19 of February, 11 & 12 of March 2006, at Smith & Wesson total students 240. I use this Remington Muzzleloader for hands on and live fire. (It is very important to me not to have this problem)

I have a 31year old son in Vermont who is also and instructor, and has the same gun will he have the same problem?

After it is fixed give me a call at 413-584-2296/or e-mail me at chiefslab@comcast.net and let me know why this happen. Thank You.

Ship your INSURED firearm by either UPS or Parcel Post to:

REMINGTON ARMS CO., INC

ATTN: Arms Service Divison
14 Hoefler Ave
Ilion, NY 13357

WARNING: DO NOT SEND LIVE OR SPENT SHELLS IN YOUR FIREARM OR IN THE SAME BOX WITH THE FIREARM. **THIS IS A VIOLATION OF FEDERAL LAW.** IF YOU FEEL YOU MUST SEND SPENT SHELLS PLEASE SEND THEM IN A SEPARATE PACKAGE AND INCLUDE NAME, ADDRESS (WITH ZIP CODE), TELEPHONE AND MODEL AND SERIAL NUMBER OF YOUR FIREARM.

:: Record the serial number of your firearm before sending it.
:: Pack your firearm for safety and to prevent further damage in shipping and handling. Preferably, ship in a firearm box. (Note: Original boxes may not be returned.)
:: Remove all accessories from your firearm to prevent loss or damage.
:: Provide a return address on both the outside and inside the box. Shipments without a proper return address will be refused.
:: Ship your INSURED firearm by either UPS or Parcel Post. Remington is not responsible for damage or loss during shipment, so you may elect to purchase insurance from your carrier.

Charge repairs will be processed using the following guidelines:

:: Repairs $75.00 and under will be completed and returned to you C.O.D. (To avoid C.O.D. Charges, please include your credit card number and expiration date with your gun)

:: For Repairs over $75.00, you will receive a written estimate detailing the nature of the repair, applicable taxes and shipping. You will have 30 days to approve the repair estimate. Repairs can be paid by check, money order, or credit card (American Express, Discover, MasterCard, or VISA). If you wish, you can expedite repairs over $75.00 by setting a pre-authorized amount that can be billed to your credit card.

Dear Remington,

I took my muzzleloader to the range to check the zero. I shot it a few times and reloaded. When I closed the bolt (without touching the trigger!!) the gun fired. Thank God it was pointing in a safe direction. I reloaded and had my father watch me closely, when I closed the bolt it fired down range for the 2nd time. I took it to my local gun smith and had him look at it. He said the "sear" was broken in the trigger. I put it and the spring in this bag. Can you please fix my gun where it will be safe again. This gun shot a near touching group at 100 yards and a sub 4 inch group at 200 yards. It has helped me bag close to 10 whitetails and a 175 yard trophy axis deer. Please let me know if I need to pay to have it fixed.

RE00115202

Remington Arms — CASE #303

There is a problem with this 700 rifle. I went to the range with my friend a few days ago. After putting 3 rounds in the magazine I closed the bolt (which picked up a round as it should), when I closed the bolt the gun fired. Even though I have shot for years I thought I must have touched the trigger. I ejected that round and put in another round and closed the bolt. It fired again. It is a good thing I have good range since and the rifle was pointing down range both times and no one was hurt (lucky). Also for some reason the stock has started to flake. This rifle has had very little use

I wish your firearm...

Model Number: 700ml	Serial Number: ml228671	
Are you the original owner?: YES NO		
Name: MATTHEW TROMBLEY	Date of Purchase: 11/30/99	
Address (no PO Boxes): 84 RICHARDS DRIVE		
City: NEWPORT	State: VT	Zip: 05855
Phone (Daytime): 802-334-9006	Fax:	
E-mail Address:(if e-mail address is provided, notification of receipt and shipment will be sent) trombley2001@verizon.net		
E-mail Address: I would like to receive future e-mail updates from Remington.		

Please describe your problem and date of occurrence:

Safety inoperable. Bolt can be opened with the safety in the fire position. When the bolt is then closed the safety can not be engaged. Further the safety can be engaged with the bolt open but when the bolt is closed and the safety moved to the fire position the gun will fire. This trigger assembly has not been adjusted/tampered with as your inspection will show. This firearm is very unsafe in this condition. 11-15-2005 is the date firearm became defective.

CONNECTOR BROKEN.
REPLACE TPA, CHECK OWN, CLEAN

How often do you lubricate the bore? (Months or Number of rounds) every range session

How often do you lubricate the action? (Months or Number of rounds) every range session

How often do you lubricate the trigger assembly? (Months or Number of rounds) ever other trip

Have you reviewed the cleaning and maintenance recommendations on our web site or in our owners manual? YES NO

When was the last time that your firearm was serviced by a Remington authorized repairman/gunsmith?) never

What were the services performed?) n/a

NOTE: In order to better service our customers some firearms/parts are sent to a certified Remington Premier Authorized Repair Center.

Ship your INSURED firearm by either UPS or Parcel Post to:

Remington Arms Co., Inc.
Attn: Arms Service Division
14 Hoefler Avenue
Ilion, NY 13357

- Record the serial number of your firearm before sending it.
- Pack your firearm for safety and to prevent further damage in shipping and handling. Preferably, ship in a firearm box. (Note: Original boxes may not be returned.)
- Remove all accessories from your firearm to prevent loss or damage.
- Provide a return address on both the outside and inside the box. Shipments without a proper return address will be refused.
- Ship your INSURED firearm by either UPS or Parcel Post. Remington is not responsible for damage or loss during shipment, so you may elect to purchase insurance from your carrier.

Charge repairs will be processed using the following guidelines:

- Repairs $75.00 and under will be completed and returned to you C.O.D. (To avoid C.O.D. Charges, please include your credit card number and expiration date with your gun)

- For Repairs over $75.00, you will receive a written estimate detailing the nature of the repair, applicable taxes and shipping. You will have 30 days to approve the repair estimate. Repairs can be paid by check, money order, or credit card (American Express, Discover, MasterCard, or VISA). If you wish, you can expedite repairs over $75.00 by setting a pre-authorized amount that can be billed to your credit card.

PS 7462

Matthew Trombley
84 Richards Drive
Newport, VT 05855

Dear Remington,

Remington 700ML Serial #ml228671 enclosed as requested by your service department after my phone call to them detailing the problems with the safety/trigger assembly. Safety system has failed to operate with the following problems: with the safety in the fire position the bolt can be operated to the open then closed position but the safety will not move from the fire to the safe position. Further the bolt opened in the fire position and the safety engaged; once the bolt is then closed the muzzleloader will fire when the safety is moved to the fire position with no movement of the trigger. If you are able to fix this problem my concern is that whatever has happened to cause this defect would again occur in the future. Please keep me posted on you findings and disposition in regards to your firearm Serial# ml228671.

Sincerely
Matthew Trombley
Phone# 802-334-9006

11/13/06-Todd Weaver is a hunting guide. His client,Chad Uselding was using Todd's M/700 rifle. Took off the safety and fired, gun did not go off. Put the safety back on and took off and the gun went off. Round went through a barn of animals(no reported injuries). Client cut hand, dropped gun, dented scope. Todd claims no alterations have been done to the firearm. He will take care of client. Has had this happen to another 700 a few years ago and he traded that in. Requests a replacement firearm. Does not want to sue.

Subject: Model 700 concern
RE: Case # 599

Dear Mr. Weaver,

We were sorry to learn of the unfortunate incident that you and your client experienced while on your hunt. We are certainly glad that your client's injuries were not any more serious, and that you are anxious to get back to enjoying the shooting sports.

As we discussed today, I have enclosed a prepaid UPS label for you to ship the rifle back to our factory for examination. A shipping box has also been ordered for you. I have included a copy of this letter to put inside the shipping box. The letter inside is important as sometimes the outside label gets damaged in transit and we want to be sure the rifle is logged in correctly. Please provide additional information about the incident on our factory repair form, including the date of the last occurrence, type of weather, type of ammunition being used, etc. This form is also available online at www.remington.com.

We apologize for the inconvenience that this incident has caused; but, hope that our actions will keep you as a loyal Remington customer.

Sincerely,

Laura Watson

Ship your INSURED firearm by either UPS or Parcel Post to:

Remington Arms Co., Inc.
Attn: Arms Service Division
14 Hoefler Avenue
Ilion, NY 13357

ⓘ **WARNING:** DO NOT SEND LIVE OR SPENT SHELLS IN YOUR FIREARM OR IN THE SAME BOX WITH THE FIREARM. **THIS IS A VIOLATION OF FEDERAL LAW.** IF YOU FEEL YOU MUST SEND SPENT SHELLS PLEASE SEND THEM IN A SEPARATE PACKAGE AND INCLUDE NAME, ADDRESS (WITH ZIP CODE), TELEPHONE AND MODEL AND SERIAL NUMBER OF YOUR FIREARM.

:: Record the serial number of your firearm before sending it.
:: Pack your firearm for safety and to prevent further damage in shipping and handling. Preferably, ship in a firearm box. (Note: Original boxes may not be returned.)
:: Remove all accessories from your firearm to prevent loss or damage.
:: Provide a return address on both the outside and inside the box. Shipments without a proper return address will be refused.
:: Ship your INSURED firearm by either UPS or Parcel Post. Remington is not responsible for damage or loss during shipment, so you may elect to purchase insurance from your carrier.

Charge repairs will be processed using the following guidelines:

:: Repairs $75.00 and under will be completed and returned to you C.O.D. (To avoid C.O.D. Charges, please include your credit card number and expiration date with your gun)

:: For Repairs over $75.00, you will receive a written estimate detailing the nature of the repair, applicable taxes and shipping. You will have 30 days to approve the repair estimate. Repairs can be paid by check, money order, or credit card (American Express, Discover, MasterCard, or VISA). If you wish, you can expedite repairs over $75.00 by setting a pre-authorized amount that can be billed to your credit card.

PS 7485

Remington®

Dear Remington Customer,

This is in response to your recent communication concerning your Remington firearm. Based on the information you have provided, we suggest that you send your firearm to us for further evaluation.

Please follow these guidelines:

- **Complete the attached form**
- **Include your full physical address and telephone number (PO Box is not acceptable)**
- **Include proof of purchase to assist in the evaluation of your repair**
- **Record your serial number for future reference**
- **Remove any accessories (sling, scope, scope mounts, case, etc.)**
- **Properly package your unloaded firearm. Do not ship in your hard case. If you need a box, please call our Parts Department: 800-243-9700, Monday – Friday, 9am-5pm, EST. (note: Original boxes are not returned with repair)**
- **Do not send live/loaded ammunition with your firearm.**
- **Mail via UPS to:** **Remington Arm Service**
  Attn: Consumer Repairs
  14 Hoefler Avenue
  Ilion, NY 13357

Your firearm will be evaluated using the following criteria to determine if your repair will be covered under warranty:

- Date of purchase
- Type of repair
- Condition/Owner maintenance of firearm

Charge repairs will be processed using the following guidelines:

- Repairs $75.00 and under will be completed and returned to you C.O.D.
  (To avoid C.O.D. charges, please include your credit card number and expiration date with your gun.)
- For repairs over $75.00, you will receive a written estimate detailing the nature of the repair, applicable taxes and shipping. You will have 30 days to approve the repair estimate. Repairs can be paid by check, money order, or credit card (American Express, Discover, Mastercard, or Visa).

We sincerely appreciate your support of the Remington Arms Co., Inc. If we can be of service to you, please call: 800-243-9700, Monday – Friday, 9am-5pm EST.

Best regards from Remington Arms Company, Inc.

Dear Remington, 1/23/06

I purchased this rifle, a couple of months ago, at K & K trains in utica. I have only fired it one time. When loading a cartridge into the chamber for the first time, and taking the saftey off, the gun fired. When this ocurred, my hands were no where near the trigger. I was fortunate, that no one, OR no object was in the bullets path. This is the 1st. Remington gun I have owned. I have many guns and have been hunting for 28 years. I feel that this problem is unsafe for myself and my children. I hope that this situation can be resolved. I was told by a local gunsmith that it was caused by the design of the trigger assembly. If so, do any newer models have a different style trigger? My friends tell me that you have an excellent reputation, and an excellent service department and I hope to do more business in the future. Thank you very much for your time.

could not duplicate problem. Will replace if owner, if owner consents to factory test for function in rifle. N/C warranty

Please describe your problem and date of ocurrence: ON November 12, 2005, I Started to aim at a Deer. AS I raisen the weapon into Shooting Position I Pushed the Safety Forward into the Fire position. At that instant the gun Discharged. At NO time Did I have my hand or Fingers around or touching the trigger assembly nor Did I touch the assembly on any object. After unloading the gun, I tried the Safety again and the Same thing happened w/the Firing assembly.

Have you reviewed the cleaning and maintenance recommendations on our web site or in our owners manual? ☑ YES ☐ NO

PS 7500

Comments:

When was the last time that your firearm was serviced by a Remington authorized repairman/gunsmith? Never

What were the services performed? NONE

Ship your INSURED firearm by either UPS or Parcel Post to:

Remington Arms Co., Inc.
Attn: Arms Service Division
14 Hoefler Avenue
Ilion, NY 13357

WARNING: DO NOT SEND LIVE OR SPENT SHELLS IN YOUR FIREARM OR IN THE SAME BOX WITH THE FIREARM. **THIS IS A VIOLATION OF FEDERAL LAW.** IF YOU FEEL YOU MUST SEND SPENT SHELLS PLEASE SEND THEM IN A SEPARATE PACKAGE AND INCLUDE NAME, ADDRESS (WITH ZIP CODE), TELEPHONE AND MODEL AND SERIAL NUMBER OF YOUR FIREARM.

:: Record the serial number of your firearm before sending it.
:: Pack your firearm for safety and to prevent further damage in shipping and handling. Preferably, ship in a firearm box. (Note: Original boxes may not be returned.)
:: Remove all accessories from your firearm to prevent loss or damage.
:: Provide a return address on both the outside and inside the box. Shipments without a proper return address will be refused.
:: Ship your INSURED firearm by either UPS or Parcel Post. Remington is not responsible for damage or loss during shipment, so you may elect to purchase insurance from your carrier.

Charge repairs will be processed using the following guidelines:

:: Repairs $75.00 and under will be completed and returned to you C.O.D. (To avoid C.O.D. Charges, please include your credit card number and expiration date with your gun)

:: For Repairs over $75.00, you will receive a written estimate detailing the nature of the repair, applicable taxes and shipping. You will have 30 days to approve the repair estimate. Repairs can be paid by check, money order, or credit card (American Express, Discover, MasterCard, or VISA). If you wish, you can expedite repairs over $75.00 by setting a pre-authorized amount that can be billed to your credit card.

PS 7506

RE00103014

October 27, 2005

Remington Country.

This gun, model 700 serial # A6474921 will discharge sometimes when you close the action, and sometimes when you take off the safe.

It seems to do it more when you take it out of the gun cabinet after it has not been used for a time.

When I took it out of the cabinet to get ready for hunting season this year, I racked it to see, and it went off 5 times in a row. and 2 times when I took the safe off.

Please fix the problem, as I really like the gun. But I am scared of it. really scared.

Thank You Remington Country

Kenneth Wilson

BRAND NEW GUN

BROUGHT IT TO THE RANGE, CLOSED BOLT AND TRIED TO PULL TRIGGER, WOULD NOT BUDGE. CHECKED SAFETY - IT WAS IN "FIRE" POSITION, WHEN I CLICKED IT TO "SAFE" POSITION (GUN OFF THE TRIGGER) THE GUN WENT OFF! I OPENED THE BOLT, EXTRACTED SHELL AND CLOSED IT AGAIN. TRIGGER STILL NO GOOD. CLICKED SAFETY TO "SAFE" AND THE GUN DRY FIRED, AGAIN. THIS IS TOO DANGEROUS FOR ME TO TRY TO FIGURE OUT, PLEASE REPLACE THIS GUN.

Roy Walker
641 Oakdale Drive
Belvedere, SC 29841

August 19,2006

Dear Sir:
I am returning my Remington Model 700 (E6492543) to you due to a problem with either the trigger or bolt. On several occasions when trying to fire the gun you can pull the trigger and nothing will happen. On two other instances the gun has fired on it's own. Once, I had shot a deer and was loading another round and as soon as I closed the bolt the gun fired. Then, just the other day I was attempting to load the firearm and again as soon as I closed the bolt the weapon fired causing damage to my son's truck. Unfortunately, I had not heard of any problems with these firearms until I went to my local gun store where he informed me that the Model 700 had problems with this. If this is the case then why are not loyal Remington gun owners being notified? My son and I both own Remington firearms and are very upset over this. I always practice safety when using a loaded weapon but it appears these guns are accidents waiting to happen. Please, repair the firearm to where it will operate in "safe" manner and return it as soon as possible. Our hunting season here in South Carolina has already started.

Sincerely,
Roy Walker

TRIG-ASSM. CONTAMINATED WITH DRIED + STICKY LUBRICATION RESIDUE CAUSING SEAR CAM TO STICK TO SIDEPLATES. REPLACE TPA, CHECK OVER, CLEAN AT ~~FACTORY~~ Quote
MC - 230145

PS 7532

8/31/2006

We received the rifle that your father shipped in. What we found was that the trigger assembly was contaminated with a partially dried and sticky residue causing the sear to stick to the sidewalls of the housing. As a result the exact incidents that he described would happen. Sometimes the gun would not fire when the trigger was pulled because the sear did not drop out of the way to allow the firing pin to go forward. Sometimes the trigger would not return under the sear because it was sticking.

We are going to clean the action, and install a complete new trigger assembly on his rifle. We are doing this service at no charge as a gesture of goodwill. If you are experiencing similar problems with your rifle please send it to my attention to be checked out.

From: Mitchell, Christy
Sent: Thursday, August 24, 2006 11:42 AM
To: Supry, Fred L.
Subject: E-6492543, Mr. Walker

Fred, I'm sure this will come to you if not already.

Customer (Mark Walker) **08/22/2006 04:31 PM**

My father and I were hunting on 08/19/2006 when his Remington 700 30-06 unintentionally went off causing damage to my 2003 GMC Z-71. All of this happened when he proceeded to load the weapon and upon closing the bolt the firearm went off. After the fact I got on-line and started researching this and found numerous articles that talk about the same thing happening. Let me go ahead and clarify something at this point and that is my father and I are both Remington owners and I have been for years. Owning both rifles and shotguns. So my question is, if this weapon has been prone to this why are they still on the market? I know from reading most of the articles that your company always blames the owners for poor maintenance, operation, home gun smithing etc. I can tell you first hand this is not the case. My father retired from the US Army after 20 years and was even a head instructor at the infantry school in Ft.Benning GA. I think he knows how the maintain a firearm. We are both very troubled by this incident and are not sure we will continue to hunt with Remington products. Please, give me some reasons as to why we should.We shipped the firearm back to your company on 08/21/2006 for repairs but are still worried that it will be unsafe.
Very concerned gun owner.

CASE #176 24" .0125

5-24-06

Dear Sir:

I called Remington Company probably about the middle of April Concerning my gun. It is fireing Sometimes when you push the safety off. I thought it done this Last Fall when I took it out to Shout a ground hog, but I wasn't sure until I got it back out this spring about the Last of March or the First of April and it fired twice when I pushed the safety off. I don't guess I have Shot 2 boxes of Shells through this gun since I have had it. I like the gun but I want a safe gun when I use one. I am sending the receipt where I purchased the gun at Wal-mart. I had them to order it and the gun has not been worked on by nobody. when I called Remington the person I talked to said Send it back and they would fix it. I work at Wal-mart in West Jefferson, N.C. on Second Shift and I am leting them send it back. If you need to talk to me I can be reached at 336-246-3920 (work) or 336-359-2933 (Home). I have always Shot

PS 7547

Remington Ammunition in the gun and I have never shot reloads in it. I have always took good care of the gun same as I do with all of my guns. I would appreciate if you could fix it or take care of this matter in some way. I dont want a gun that I am afraid of. If you have any questions please call me.

Thanks,
Charles Adams

RE: Model 700 Accidental Discharge

Dear Gene,

We were sorry to learn of the unfortunate incident that your father experienced. We would like to examine the incident rifle to determine the cause of the incident.

I have enclosed an ARS label for you to return the rifle to my attention for examination. Once we have completed the examination, we will contact you to discuss our findings. I have provided a copy of this letter to put inside the shipping box. The letter inside is important as sometimes the outside label gets damaged in shipment and we want to be sure the rifle is logged in correctly. Please record the serial number of the rifle prior to shipment, so if you call we can track the rifle by the serial number to report the status.

We apologize for the inconvenience that this incident has caused; but, look forward to being of service. If you have any questions feel free to contact me directly.

Sincerely,

Fred Supry, Manager

MY FATHER HAS A REMINGTON 243 MODEL 700 .HE WAS TRYING TO SHOOT A COYOTE THAT WAS CHASING HIS COWS.THE GUN WENT OFF TWICE W/O HIM EVEN TOUCHING THE TRIGGER.HE WENT BACK TO THE SAME FIELD A FEW DAYS LATER , AND FOUND THAT ONE OF HIS PREGNANT COWS WAS DEAD. THE GUN SHOT HIS COW WHEN IT WENT OFF ON ITS ON .WHAT WOULD CAUSE THIS TO HAPPEN? HE IS VERY UPSET OVER THIS. BY THE WAY THIS GUN HAS GONE OFF BEFORE LIKE THIS. PLEASE LET HIM KNOW WHAT NEEDS TO BE DONE. HE IS READY TO DIG A HOLE AND BURY THIS GUN.IS IT FIXABLE? DOES THIS HAPPEN FROM TIME TIME?IT IS VERY DANGEROUS.HE IS SCAREED FOR HIMSELF AND HIS FAMILY TO HAVE THIS GUN AROUND.

Customer Service

Gentlemen;

Enclosed is a Model 700 BDL (#C6642342) belonging to one of my customers who had a problem with it this past hunting season; twice while taking the safety off the rifle discharged. Needless to say he was a bit taken aback by the episodes and would like to have the problem taken care of. As far as he can remember, he thinks the rifle is about twenty years old. Please get back to me with the results of your inspection and what needs to be done.

I can be reached at the address or phone number shown in the letterhead; and I have enclosed a copy of the shop's current FFL to update your files. Thank you.

Sincerely,

Douglas A. Spooner

RE: Model 700 Serial #: E6462408

Dear Robert,

We were sorry to learn of the accidental discharge that you experienced with your Model 700 rifle. Fortunately nobody was injured in this most unfortunate incident. As we discussed, I have enclosed an ARS labels, return to factory only labels, shipping boxes, and copies of this letter to put inside the shipping boxes for you to return the above rifle plus another rifle to be examined and repaired at no charge. You need to remove the scopes so they do not get damaged in shipment. The letter inside the shipping box is important as sometimes the outside label gets damaged in transit and we want to be sure the rifles are logged in correctly.

We apologize for the inconvenience that this incident has caused and for not responding sooner. I enjoyed our conversation and hope you remain the "Remington man" that I spoke with. When you see Ken Waite tell him hello from me and Dennis Sanita. Dennis was the product service manager prior to me.

Sincerely,

Fred Supry, Manager

Fred,
Think you may need to give this guy a call back. He's jumping up and down about safety, recall, Attny Gen'l, etc. His 700 went off when taking the gun off of safe, nearly "blew his neighbor's head off", according to his msg.

Subject: Model 700 concern
RE: Case # 612

Dear Mr. Blair,

We were sorry to learn of the unfortunate incident that you experienced while enjoying the shooting sports. My understanding of this incident is that the rifle fired when you closed the bolt. We are certainly glad that you are ok and that you are anxious to get back to enjoying the shooting sports.

As we discussed, I have enclosed a prepaid shipping label for you to ship the rifle back to our Premier Remington Authorized Repair Center, Mann & Sons Sporting Goods for examination and repair. I have also included a copy of this letter to put inside the shipping box. The letter inside is important as sometimes the outside label gets damaged in transit and we want to be sure the rifle is logged in correctly. Please provide additional information about the incident, including the date of the last occurrence, type of weather, type of ammunition being used, etc.

We apologize for the inconvenience that this incident has caused; but, hope that our actions will keep you as a loyal Remington customer.

Sincerely,

Laura Watson

☑ I would like to receive future e-mail updates from Remington.

Please describe your problem and date of ocurrence:

I have a Remington 7mm mag that sometimes fires when the safety is moved into the "Fire" position. The gun will fire without the trigger being pulled. It will misfire like this several times in a row and than not do it again for months.

Also- the safety on this gun has become extremely difficult to move into the "Fire" position and it makes a very loud CLICK when it does move.

SAfety works hard. could not duplicate concern. Replace TPA, check out., clean AT N/C #230148

RE: Model 700 Concern

Dear Carroll,

We were sorry to learn of the unfortunate incidents that you experienced while using your Model 700 3006 caliber rifle. We are certainly glad that no one was hurt.

When we removed the action from the stock we found the trigger assembly to contain a sticky residue and field debris stuck to the assembly housing. While we were unable to duplicate the concern, it is possible that in a different environment this could cause the trigger to stick and not reliably return under the sear. In that case when the safety was taken off the sear would not catch the trigger and the rifle would fire.

We are going to clean the action and install a complete new trigger assembly. Once the work is completed the rifle will be sent to our gallery and test fired, upon passing the gallery tests it will be returned for a final inspection. Once the rifle passes all the tests and checks it will be returned to you. This service will be done at no charge. I will also issue the paperwork needed to get your $10 shipping charges reimbursed.

To prevent this in the future, we advise that the stock be removed periodically and the trigger housing be flushed with a good gun cleaner then allowed to dry or blown out with an air hose if available. A drop of oil on each side of the sear is all the lubrication that is needed. Move the sear up and down to be sure it is working freely and do the same with the trigger. If you have any questions feel free to contact me directly. We apologize for the inconvenience that this incident has caused. We wish you many years of enjoying the shooting sports.

Sincerely,

Fred Supry

How often do you clean the bore? (Months or Number of rounds)	10 rounds/monthly
How often do you clean the action? (Months or Number of rounds)	
How often do you clean the trigger assembly? (Months or Number of rounds)	
Brand of lubricant used:	Rem oil

PS 7616

How often do you lubricate the bore? (Months or Number of rounds) eg. month - during season
How often do you lubricate the action? (Months or Number of rounds)
How often do you lubricate the trigger assembly? (Months or Number of rounds)
Have you reviewed the cleaning and maintenance recommendations on our web site or in our owners manual? ☒ YES ☐ NO
Comments: I am very upset. Please return w/ problem corrected ASAP
When was the last time that your firearm was serviced by a Remington authorized repairman/gunsmith? never
What were the services performed?
Ship your INSURED firearm by either UPS or Parcel Post to:

REMINGTON ARMS CO., INC

ATTN: Arms Service Divison
14 Hoefler Ave
Ilion, NY 13357

WARNING: DO NOT SEND LIVE OR SPENT SHELLS IN YOUR FIREARM OR IN THE SAME BOX WITH THE FIREARM. **THIS IS A VIOLATION OF FEDERAL LAW.** IF YOU FEEL YOU MUST SEND SPENT SHELLS PLEASE SEND THEM IN A SEPARATE PACKAGE AND INCLUDE NAME, ADDRESS (WITH ZIP CODE), TELEPHONE AND MODEL AND SERIAL NUMBER OF YOUR FIREARM.

:: Record the serial number of your firearm before sending it.
:: Pack your firearm for safety and to prevent further damage in shipping and handling. Preferably, ship in a firearm box. (Note: Original boxes may not be returned.)
:: Remove all accessories from your firearm to prevent loss or damage.
:: Provide a return address on both the outside and inside the box. Shipments without a proper return address will be refused.
:: Ship your INSURED firearm by either UPS or Parcel Post. Remington is not responsible for damage or loss during shipment, so you may elect to purchase insurance from your carrier.

Charge repairs will be processed using the following guidelines:

:: Repairs $75.00 and under will be completed and returned to you C.O.D. (To avoid C.O.D. Charges, please include your credit card number and expiration date with your gun)

:: For Repairs over $75.00, you will receive a written estimate detailing the nature of the repair, applicable taxes and shipping. You will have 30 days to approve the repair estimate. Repairs can be paid by check, money order, or credit card (American Express, Discover, MasterCard, or VISA). If you wish, you can expedite repairs over $75.00 by setting a pre-authorized amount that can be billed to your credit card.

I want my $10 shipping re-imbursed.

(1) Occasionaly when closing the Bolt the firing pin will snap Foward. 2005 it happend one time, 2004 it happend once and caused the round to go off. 5 or six years ago this happend several times while hunting allowing a deer to excape.

(2) 2005 the trigger pull became so Hard that I got a very poor Hit on a Deer and caused much unneeded pain to this Animal. the trigger pull was easy before and after this shot.

(3) When this rifle was new it took Both thumb to release the safty, this corrected it self.

(4) if it needs a new trigger Assembly I just want it Fixed

Customer (Bud Caretti) - 12/04/2005 09:35 AM
My 15 year old daughter has a 3 year old Model 700 243cal. This hunting season when she clicked the safety off the gun fired. This happened several times, once injuring her nose. I took the rifle to a local gunsmith who removed the trigger to find that the grease you installed during manufacturing had gummed up the trigger. He cleaned it out and now it seems to be working properly. This rifle has less than 1 box of shells fired, and has been carried about 10 days in the field. I was wondering if this trigger should be replaced and if you have had this sort of problem with this model rifle?
Thanks, Bud Caretti

Response (Dell) - 12/09/2005 03:21 PM
Dear Bud,

Thank you for taking the time to write into us. We are not aware of the issue that you experienced in the Model 700.
According to the serial number that you provided, your Model 700 was produced in 2002.

As with any new firearm, it should be thoroughly cleaned before using. Be sure to clean the entire gun before and after long-term storage, and no less than once a year. It's also important to clean your gun whenever it's been exposed to adverse conditions such as rain, dirt, mud, snow, sleet or saltwater.

For safe and dependable operation of your firearm, all parts of your gun must be properly cleaned and lubricated. Periodically inspect the internal workings of your firearm to be sure they're clean and free of rust, unwanted dirt and debris.

Use recommended lubricants on your gun and do not over-lubricate. Excessive use of a non-recommended lubricant could adversely affect the function and safe operation of your firearm. Remember, you are responsible for the proper care and maintenance of your firearm. Failure to properly maintain your firearm can ruin your firearm.

If you would like for our factory to inspect your firearm, please print out the Factory Repair Form at the following link.

http://www.remington.com/support/repair_services/factory_repair_form.asp

Customer (Bud Caretti) - 12/09/2005 11:43 PM
Let me tell you again that this rifle was used very little. It was cleaned before and after each of the 2 hunting seasons in Pa. which lasts 2 weeks. I was not aware that the trigger needed to be remove from the rifle to be cleaned. The rifle was not out in adverse conditions as my daughter does like to hunt in them. I, along with the gunsmith I took it to feel that it was a manufacturing problem with this rifle. The fact the it injured her I feel that there should be more of an answer than "clean your gun"

Response (Dell) - 12/10/2005 11:27 AM
Dear Bud,

We apologize for any problems you may have experienced. We would like to have the rifle sent into our factory in Ilion, NY to the attention of Product Services for inspection. Please include a detailed note stating issue with rifle, your name, address, and daytime phone number so that Product Services can contact you.

The following link will provide you with the Factory Repair Form to print out.

SUBJECT: **Cost of Damage Reimbursement**
Ford F250 7.0L Diesel Transmission

Dear Mr. Supry:

I would like to take this opportunity to thank you for taking your time to here my complaint about the model 700 .270 SN 6555991. Per our second phone conversation on November 18, 2005 presented in attachment A is the invoice for services conducted on my 2002 Ford F250 7.0L diesel crew cam pickup transmission. I have already paid for these services and would like to be reimbursed do to the malfunction of the Model 700 .270 rifle safety mechanism.

BACKGROUND

Back on October 29, 2005 my wife, six friends and my self went elk hunting in the Missouri Breaks in north eastern Montana. Concluding a walk we arrived at my pickup to load up and go to another hunting location, as I was unloading my gun I informed my wife to unload the Model 700 .270 Remington rifle. As my wife flipped the safety onto the fire position to unlock the bolt to unload the cartridges from the rifle the Model 700 .270 fired and the bullet went into my transmission at an angle. At that time my wife fell into tears do the incident and started to tell all of us that she did not pull the trigger or even have here finger on the trigger. After we all calmed down over this horrible incident one of our friends asked us what kind of rifle we had and I told him a Model 700 .270 that my father gave to me and that it was purchased back in 1972 or 1973. Our friend informed us that he thought there was problems with some of these guns in particular the safety.

I believe there are several reasons why Remington Arms Company should reimburse me for the replacement of my pickup transmission. But foremost I am very lucky under this situation that I was not injured or killed by the firing of the rifle due to the safety acting as a firing trigger and was I was located at the time of the incident. I am even more fortunate that my wife was using the rifle and not one of my three sons, due to there age and that they are still learning about the safety and use of firearms.

If you should have any questions about the cost on the invoice or would like any additional information, please contact me at my office (406) 248-9161, my home (406) 651-9489 or my cellular phone (406) 670-4844.

Sincerely,

Roger W. Herman Jr.

PS 7667

When I called the customer service number they told me to ship my gun to you because I have been having problems with the safety and trigger mechanism. The gun is not quite two years old and has hardly been used. A few months ago I was out and when I switched the safety to off the gun fired automatically without pulling the trigger. I unloaded the gun and tried about twenty times cocking the bolt and playing with the trigger and it kept firing each time I switched the safety off. I took the gun home and took it completely apart and cleaned the gun thoroughly and looked for any obvious signs of a problem and I could not see anything wrong and the gun seemed to work fine after that. However the gun did the same thing again. I once again took the gun apart and got it to stop, but I don't exactly know what it causing it to do this or what is causing it to stop doing this but either way I no longer trust the gun to keep using it. Like I said the gun is fairly new and is hardly used and well maintained so I don't know what is wrong. If you could please try and figure this out I would appreciate it and the gun should still be under the two year warranty.

Thanks,
Robert Bacha

Remington Firearms
Ilion Firearms Plant & Custom Shop
14 Hoefler Avenue
Ilion, NY 13357

Attention: Fred Supry

Dear Sir:

On October 2, near Jackson Hole, WY, I was hunting with my Remington 700 7mm rifle. When I returned to my 2006 Ford extended cab truck, I opened both driver side doors (it was raining hard), took off my backpack, put it inside and picked up my rifle to unload the shell in the chamber. The gun was on safety and when I pushed it towards the fire position and before I started to open the bolt, the gun went off.

Pictures show damage to truck and my left thumb. The left thumb has a perfect small hole, the size of the safety lever, from the recoil.

I have hunted with this rifle for over 20 years; I load my own shells and love my rifle. This is the first time something like this has ever happened. I didn't continue to hunt for fear that an accident could have occurred after this incident.

I would only ask to have my rifle repaired and to be reimbursed for my truck damage, (the estimate from Ford is enclosed) and for my license cost $952 and my expenses: $1,000 for lodging, meals, diesel fuel and my share of camp food for two weeks of hunting. My trip started on September 26 and was to end October 9. I lost a full week of hunting because of this problem with my rifle.

Thank you for your attention to this matter.

Sincerely,

Jim Bailey

RE: Settlement Release

Dear Jim,

Your rifle is currently being repaired. During our testing we were able to get the firing pin to follow-down. We will install a complete new trigger assembly in your rifle. The new trigger assembly will allow you to load or unload the rifle with the safety in either position. Once the repair is completed, the rifle will be tested in our plant gallery, and returned for final inspection. When it passes these test it will be returned to you via next day delivery.

I have enclosed a release that needs to be signed, notarized and returned to my attention. Your social security number is necessary in order to process the settlement check. I have also enclosed a return FedEx envelope to help speed up the process. We added up all your losses, including the shipment charges, and rounded the amount up to $4500.00.

We apologize for the inconvenience that this incident caused. If you have any questions feel free to contact me directly.

Sincerely,

Fred Supry

RELEASE

KNOW ALL PERSONS BY THESE PRESENTS:

That I, **Jim Bailey**, of **Medford, OR 97504** being of full age, in consideration of and upon receipt of **Four Thousand Five Hundred Dollars (US$4500.00**, do here-by release and forever discharge Remington Arms Company, Inc., E.I. du Pont de Nemours and Company and Sporting Goods Properties, Inc., (formerly named Remington Arms Company, Inc.) (together, the "Releasees"), their successors, assigns, employees, officers, agents and directors from all debts, claims, demands, damages, costs, expenses, actions and causes of action what-so-ever, known and unknown (including claims for loss of consortium), on account of, resulting, or which may result from property damage or injury received by me on or about **October 2** of **2006** which I have claimed was caused while using products manufactured and/or sold by one or more of the Releasees.

I further state (a) that receipt by **Jim Bailey**, of the consideration described above constitutes a full and complete settlement of the claims described above, that this release is a compromise and is not to be construed in any way as an admission by the Releasees (i) of any responsibility for the accident, or for an alleged defect in said product, or (ii) that any such defect exists and (b) that I have carefully read and understand the contents of this release and sign the same as my own free act; and (c) that this release shall be construed and interpreted according to the laws of the UNITED STATES and the state of NEW YORK.

Subject: Model 700 Serial# A6422658
RE: Case #639

Dear Mr. Cantrell,

We were sorry to learn of the incident that you experienced with your firearm. As I understand your explanation, your rifled fired when you released the safety. We are certainly glad that everyone is ok, and that you are anxious to get back to enjoying the shooting sports.

As we discussed, I have enclosed a prepaid UPS shipping label for you to ship the rifle back to our factory for examination and repair. I have also included a copy of this letter to put inside the shipping box. (The shipping box will come to you under separate cover.) The letter inside is important as sometimes the outside label gets damaged in transit and we want to be sure the rifle is logged in correctly. On the factory repair form, please provide additional information about the incident, including the date of the last occurrence, type of weather, type of ammunition being used, etc.

We apologize for the inconvenience that this incident has caused and we hope that our actions will keep you as a loyal Remington customer.

Sincerely,

Laura Watson

Greetings,

I am sending you two 700's that need repair. When the repairs are completed please reset the trigger pulls on both weapons to three and one half pounds (3 1/2). Please return the weapons to my attention at One Police Plaza Elizabeth N.J. 07201 also if possible please call and advise me when they are shipped. My office number is 908-558-2062 my cell number is 908-403-3591.

Repairs needed:

Remington 700 - serial number G6447463 - 1) Bolt catch sticks in the open position. lever has to be pulled down to function properly. 2) Has had episodes of firing when the safety is switched to the fire position. 3) reset trigger to 3 1/2 lbs.

Remington 700 - serial number G6454894 - 1) Trigger will not set below 5 1/2 lbs. Please reset to 3 1/2 lbs.

Thank you in advance for your assistance. If there are any questions please call me at the above numbers or E-mail me at sacca@optonline.net. Also Please turn these weapons around as soon as possible as the are duty weapons.

Sincerely,

Sergeant Giacomo Sacca

Bob Leskovar,

Per our phone conversation last week, I am requesting that you inspect and make any adjustments/repairs to the enclosed rifle, serial number B6770471, to bring it back to factory specifications so that we may issue this rifle for duty use. This rifle was involved in an accidental discharge on the range during training. It was reported to discharge when the operator moved the rifle's safety from the on-safe position to the off-safe position. Thanks again for your assistance.

Please ship the rifle back to:

Colorado Dept. of Corrections
Central Armory/attention: Lt. Ben Perez
Highway 50 and Evans Blvd.
Canon City, CO 81212

Thank you for your help with this matter.

Lt. Ben Perez

E-mail Address: ☐ I would like to receive future e-mail updates from Remington.		

Please describe your problem and date of ocurrence:

Customer inherited this rifle. Upon first use, experienced an accidental discharge when taking gun off safety. thankfully there was not an injury. I do not work on triggers so I am sending it in for your examination and repair. I consider the gun unsafe as is.

Please advise.

Scott Castle

(615) 476-9019

Dear Mr. Supply,

I have a Remington 700, .25-06, #A6759459. The incident happened on Dec. 3rd, 2005. I pulled the bolt back and put in 4 shells. After chambering a round, I proceeded to lock down the bolt and the gun went off, shooting a hole through my truck door. After that, I took the gun to a local sporting goods store where I learned about the recall. I can be reached via phone at 615-476-9019.

My gun is enclosed per your instructions.

Sincerely,

Patrick Cummons

P.S – Sorry about the box – it's the only one we could find.

While sighting rifle in - customer moved the safety and the gun fired damaging his friend's truck and cutting his thumb. Rifle had been in two years ago for the bolf lock modification program and only fired a couple times since then. Letter and ARS label sent 11/29/05. Found that the trigger was bent and making contact with the trigger guard - Clean action and install new TA, check trigger clearance, check over competely and make any repairs needed at n/c as gesture of goodwill - charge 230145. Repair and Shipping Document 2/20/06.

RE: Model 700 Accidental Discharge

Dear Steven,

We were sorry to learn of the unfortunate incident that you experienced while sighting in your Model 700 rifle. We are glad that you were not seriously injured. We hope that the damage to your friend's pickup truck is minor and easily repaired.

As we discussed, I have enclosed an ARS label for you to return the firearm to my attention for examination and repair. We have offered to repair the rifle at no charge as a gesture of good will. We understand that you had the bolt lock modification completed a couple years ago and the rifle had only been fired a couple times since then. Please put a copy of this letter inside the shipping box along with any other information that you would like to share about this incident. The letter is important as sometimes the outside label gets damaged in transit and we want to be sure the rifle is logged in correctly.

We apologize for the inconvenience that this incident has caused. If you have any questions please feel free to contact me directly.

Sincerely,

Fred Supry

RE: Model 700 Accidental Discharge

Dear Steven,

We were sorry to learn of the unfortunate incident that you experienced while sighting in your Model 700 rifle. We are glad that you were not seriously injured. We hope that the damage to your friend's pickup truck is minor and easily repaired.

As we discussed, I have enclosed an ARS label for you to return the firearm to my attention for examination and repair. We have offered to repair the rifle at no charge as a gesture of good will. We understand that you had the bolt lock modification completed a couple years ago and the rifle had only been fired a couple times since then. Please put a copy of this letter inside the shipping box along with any other information that you would like to share about this incident. The letter is important as sometimes the outside label gets damaged in transit and we want to be sure the rifle is logged in correctly.

We apologize for the inconvenience that this incident has caused. If you have any questions please feel free to contact me directly.

Sincerely,

Fred Supry

Examination conducted by James Hutton 4/27/2006 at the Princeton Township Police Department. The trigger set screw positions had been altered to an unsafe condition by an outside gunsmith hired by the PD. As examined the firearm would follow down during cycling sometimes, and catch on the sear other times due to the improper adjustments.

RE: Model 700 concern
Serial #: G6259316

Dear Bob,

Enclosed is the ARS label for you to return the subject rifle to my attention to have a new trigger assembly installed. I forgot to leave it with you when we did the examination. We are aware that you have to wait until the rifle is returned from the Township police. Once we get the rifle we will install the new trigger assembly and completely go over the rifle at no charge.

I have also enclosed a copy of this letter to be returned when you return the rifle. Please put the copy the shipping box. The letter inside is important as sometimes the outside label gets damaged in transit and we want to be sure the rifle is logged into our system correctly.

We look forward to being of service.

Sincerely,

Fred Supry

RE: Model 700 concern

Dear Bob,

We were sorry to learn of the unfortunate incident that you experienced while enjoying the shooting sports. We are certainly glad that your injuries were not any more serious, and that you are anxious to get back to enjoying the shooting sports.

As we discussed Friday evening, I have enclosed an ARS label for you to ship the rifle back to my attention for examination and repair. I have also included a copy of this letter to put inside the shipping box. The letter inside is important as sometimes the outside label gets damaged in transit and we want to be sure the rifle is logged in correctly. Please provide additional information about the incident, including the date of the last occurrence, type of weather, type of ammunition being used, etc.

We apologize for the inconvenience that this incident has caused; but, hope that our actions will keep you as a loyal Remington customer.

Sincerely,

Fred Supry, Manager

RE: Model 700 concern
Serial #: E6608537

Dear Dennis,

We were sorry to learn of the unfortunate incidents that occurred while you were readying to fire at a coyote. As you stated, it is fortunate that good firearms handling practices were observed and the damages were limited to property damage.

As we discussed, I have enclosed a copy of this letter and an ARS label for you to return the rifle to my attention. Once we have completed the examination of the rifle we will contact you at 501-796-2509 to discuss our findings. I'm sure that we can work together to reach a mutually acceptable conclusion to these most unfortunate events. Please be sure to put the letter copy inside the shipping box. The letter inside the box is important as sometimes the outside label gets damaged in transit and we want to be sure the rifle is logged in correctly.

We apologize for the inconvenience that these incidents have caused. If you have any questions feel free to contact me directly.

Sincerely,

Fred Supry

Problem with The Rifle:

1. SAFety is not Right
2. It Fires when you close the Bolt
3. After it is FIRED the BASE OF CASING is severely SCRATCHED By the Primer.

I HAD FIRED it AND it Blew up the CASE. COULD Not get CASING out SO I took it to A GUN SMITH AND he took the Rifle APART to get the case out. I Really Don't think the BOLT AND CHAMBER were ever MADE Right. Hope you CAN FIX it. I thANK you CARL

(TRIG. ASSM. is contaminated w/ a partially DRIED & STICKY LUBRICATION WHICH CAUSING PARTS TO BIND. Replace TPA, check lower completely clean at. 1/2 MSP)

Ship your INSURED firearm by either UPS or Parcel Post to:

REMINGTON ARMS CO., INC

ATTN: Arms Service Divison
14 Hoefler Ave
Ilion, NY 13357

WARNING: DO NOT SEND LIVE OR SPENT SHELLS IN YOUR FIREARM OR IN THE SAME BOX WITH THE FIREARM. **THIS IS A VIOLATION OF FEDERAL LAW.** IF YOU FEEL YOU MUST SEND SPENT SHELLS PLEASE SEND THEM IN A SEPARATE PACKAGE AND INCLUDE NAME, ADDRESS (WITH ZIP CODE), TELEPHONE AND MODEL AND SERIAL NUMBER OF YOUR FIREARM.

:: Record the serial number of your firearm before sending it.
:: Pack your firearm for safety and to prevent further damage in shipping and handling. Preferably, ship in a firearm box. (Note: Original boxes may not be returned.)
:: Remove all accessories from your firearm to prevent loss or damage.
:: Provide a return address on both the outside and inside the box. Shipments without a proper return address will be refused.
:: Ship your INSURED firearm by either UPS or Parcel Post. Remington is not responsible for damage or loss during shipment, so you may elect to purchase insurance from your carrier.

Charge repairs will be processed using the following guidelines:

:: Repairs $75.00 and under will be completed and returned to you C.O.D. (To avoid C.O.D. Charges, please include your credit card number and expiration date with your gun)

:: For Repairs over $75.00, you will receive a written estimate detailing the nature of the repair, applicable taxes and shipping. You will have 30 days to approve the repair estimate. Repairs can be paid by check, money order, or credit card (American Express, Discover, MasterCard, or VISA). If you wish, you can expedite repairs over $75.00 by setting a pre-authorized amount that can be billed to your credit card.

Mike Frye
118 S. Main
Elroy, WI 53929

Subject: Model 700 Serial# C6453768
RE: Case #627

Dear Mr. Frye,

We were sorry to learn of the incident that you experienced with your rifle. We are certainly glad that you reported this to us and that you are anxious to get back to enjoying the shooting sports.

As we discussed, I have enclosed a prepaid UPS shipping label for you to ship the rifle back to our factory for examination and repair. I have also included a copy of this letter to put inside the shipping box. (The box will arrive under separate cover) The letter inside is important as sometimes the outside label gets damaged in transit and we want to be sure the rifle is logged in correctly. On the factory repair form, please provide additional information about the incident, including the date of the last occurrence, type of weather, type of ammunition being used, etc.

We apologize for the inconvenience that this incident has caused and we hope that our actions will keep you as a loyal Remington customer.

Sincerely,

Laura Watson

Remington,

In December, 2005 I purchased a new 700CDL rifle chambered for the .280 Rem. As is typical for a new Remington rifle the trigger came set at such a heavy pull that no serious rifleman would shoot it. I took the rifle to a gunsmith to have the trigger adjusted. Upon trying to adjust the trigger the sear engagement screw was unable to be broken free in order to adjust it. Two screwdrivers were broken trying to break the screw free, but to no avail. Attempts were made to adjust the trigger without adjusting the sear engagement but the trigger could not be adjusted below 4 ½ lbs. without the rifle slam-firing when the bolt was closed. It was determined that the trigger was defective and instead of sending it back to you I decided to put an after market trigger on it. After installing the after-market trigger attempts were made to adjust the trigger and exactly the same thing occurred as with the factory trigger, the rifle would slam-fire when the bolt was closed. At this point it was determined that there was something wrong with the rifle itself, although the factory trigger was clearly not functioning as it was designed to do. I can not figure out why both the factory and an after market trigger would both slam-fire when we tried to adjust them below 4 ½ pounds. I think that the chances of having two different triggers in a row that are defective are a remote possibility and as of such the problem has to be in the rifle itself. I have shot rifles for over 40 years and have 13 Remington firearms. All of my firearms have the original triggers with my rifle triggers set at 2 lbs. and I have never had a trigger malfunction. The rifle that I am returning to you has never been fired, and has not ever even had a scope mounted on it. I have told many people that I believe that the Remington 700s are the best bargain in the industry. The accuracy and the smoothness of the action are unsurpassed, even in much more expensive firearms. Please return to me a rifle that lives up to the expectations that I have come to expect when I purchase a Remington.

Factory Repair Form

Return to Previous Page

NOTE: Please complete and print this form, and then include it with your firearm.

Model Number: 700		**Serial Number:** S6499145	
Are you the original owner?: ☑ YES ☐ NO			
Name: Frank E. Davis Jr.		**Date of Purchase:** 15 Dec 2005	
Address (no PO Boxes): 4215 Femoyer Ave. Unit B			
City: Elmendorf AFB	**State:** AK	**Zip:** 99506	
Phone (Daytime): (907)-317-0233		**Fax:**	
E-mail Address: frank.davis@elmendorf.af.mil ☐ I would like to receive future e-mail updates from Remington.			

Please describe your problem and date of ocurrence:

I won this rifle in an Air Force Raffle, I sighted it in at the range 20 rounds one week and then another 20 rounds the following week with no problems. I then took the rifle hunting and on Saturday the 6th of May 2006 the first day of my hunt I loaded three rounds in the magazine and placed one in the chamber and when I closed the bolt and locked it the rifle discharged. I have had no trigger work done to the rifle and have not done anything with the rifle since the incident mentioned above.
I contacted customer service and they advised me to send the rifle to you

Thank you for your time and I hope you find what went wrong (was a scary situation, first time this has happened to me, but safe gun handling practices saved the day)
no one was injured

C					

11/20/06-Thomas Frye called, extremely upset because his new M/700 fired upon closing the bolt. The gun kicked back and took a chunk of skin from his right thumb. He could not put the safety on, it was stuck. His riend is a nurse and cleaned him up but said there was nothing that could be done for the skin that was torn off of his thumb. He returned the firearm to Walmart and they gave him a new gun due to his injuries. The Walmart reps were making fun ie. snickering at him because he had a difficult time writing with this injury. A claim (file#5125024) has been filed with us from Walmart. Mr. Frye states that he has many Remington guns but the last two (this 700 & an 870 Express) have both been problems. He asked that we help him with the M/870 and cover damages at the shooting range. lw

Dear Consumer Services:

I have been notified that one of our customers has experienced a problem with your product **REMINGTON 700 ADL purchased from Wal Mart Stores, Inc. Customer claims that when bolt was being engaged that gun went off shooting hole in ceiling and when bolt released back it caught and took off tip of thumb.**

Please contact the customer and assume the handling of this claim or request that your liability carrier take over the matter. We ask that the customer be contacted as soon as possible.

Vendor No: 964572	Model-Stock No: 5955
UPC No: 47700259550.00	Date of Purchase:
Item No: 4857128	Location of Product: Store

By copy of this letter to our customer, I am advising them of our request, and notifying you to contact the customer for further information. Please notify us of the final disposition.

If you have any further questions you may contact me at 479-621-9800 ext 20515

Thank you for your anticipated cooperation.

Sincerely,

Belinda Gilliming

TRIGGER ASSEMBLY CHECKLIST

GUNSMITH NAME: GRUNDMANS INC

CUSTOMERS NAME: RUSS PORTERFIELD

MODEL: 700 SERIAL #: 6581676

DATE: 6-17-06

Firing Mechanism Examination Process

Question	Yes	No
1. Is there the appearance of any rust on any of the Trigger assembly parts		✓
2. Is there any dirt or grime on any of the parts within the trigger assembly parts		✓
3. Does there appear to be any sticky substances (grease,oil etc.) on any of trigger assembly parts that would inhibit its functioning	X	✓
4. Do any parts appear to be worn that would cause the gun not to function properly		✓
5. Do any parts appear to be damaged or broken		✓
6. Has the sear engagement adjustment screw settings been altered in any way (has the seal been broken)		✓
7. Have any of the seals on any of the other Trigger plate assembly screws been broken, tampered with	X	✓
8. Firearm received with a safety related concern, **MUST BE RETURNED TO THE FACTORY**		✓

They did not examine this very well if they missed the sticky residue.

Discussion Thread

Response (Kati) - 01/06/2006 11:08 AM
Dear Russ:

Please contact us at 1-800-243-9700 M-F 9-5pm EST. and ask for Repair in order for us to assist you!

Customer (Russ Goldsmith) - 01/05/2006 04:41 PM
I don't think the bolt lock is the issue, I purchased the rifle new in 1996.

THE WEAPON SHOULD NOT FIRE UNLESS THE TRIGGER IS PULLED. Having the weapon fire when the bolt is closed with my hands on the stock and bolt indicates a safety problem with this rifle. I need to get it fixed, and it should not be at my expense, this is a manufacturing defect.

Russ Goldsmith

Response (Kati) - 01/05/2006 10:49 AM
Dear Russ:

Thanks for visiting Remington Country!

Safety Modification Program

Remington Model 700 & Model 40-X
If you own a Remington Model 700 or Model 40-X rifle:
Only those Model 700 or 40-X rifles made before March 1982 were manufactured with a bolt-lock mechanism. Model 700 or 40-X rifles made after March 1982 do not have a bolt-lock mechanism and may be loaded and unloaded with the safety in the "S" or "On Safe" position. Consequently, post-1982 Model 700 or 40-X rifles are not subject to this bolt-lock Safety Modification Program.
To determine whether your Model 700 or 40-X rifle has a bolt-lock mechanism, either:

. Call Remington toll-free at 1-877-387-6691 and a service representative will help you determine if your firearm has a bolt-lock mechanism, or
. Take your Model 700 or 40-X rifle to a Remington Authorized Repair Center and a qualified gunsmith will examine your firearm and determine whether it has a bolt-lock mechanism.

If your Model 700 or 40-X rifle has a bolt-lock mechanism, it is eligible for the Safety Modification Program. If you participate, your firearm will be cleaned and inspected for proper functioning by a qualified gunsmith. Once the condition of your firearm has been assessed, you will be notified of one of the following:

. Your firearm's trigger assembly is otherwise in good operating condition, and the gunsmith will proceed to physically remove the bolt-lock feature so that your rifle can be loaded and unloaded while the safety remains in the "S" or "On Safe" position; or
. Your rifle's trigger assembly is found to be in an unsatisfactory or potentially unsafe operating condition because of any number of factors, including wear, alteration or maintenance. The entire trigger assembly will be replaced with a new factory trigger assembly, which does not incorporate a bolt-lock mechanism.

In either case, the total cost to you is $20, shipping and handling. You will also receive a rebate coupon good for up to $20 toward the purchase of any Remington safety product, including gun locks, hearing and eye protection, and gun safes.

How to participate in the Safety Modification Program

Complete the General Repair Form and
Send or deliver your firearm and the completed repair form to either:
a) A Remington Authorized Repair Center; or
b) Ship your firearm to the Remington factory at:
Remington Arms Company, Inc.
Ilion Firearms Plant
Attention: BL Safety Program
14 Hoefler Avenue
Ilion, NY 13357

PS 7875

Remington will bill or arrange for payment once your firearm is received and evaluated.

CAUTION: It is your responsibility to comply with all laws and regulations regarding transportation or shipping of your firearm. Absolutely no ammunition should be packaged with the firearm whether loaded in the firearm itself or included in the shipping container. The firearm should be transported only in a completely unloaded condition.

Kati Howerton

Customer (Russ Goldsmith) - 01/04/2006 09:30 PM
I have a Remington Model 700 that I purchased in 1996, for elk hunting, but never had the opportunity to go until 2005. This rifle has only been fired about 30 times, but on an elk hunt in Colorado the rifle fired when I closed the bolt, without pulling the trigger. This happened once before on the range. I think this is a manufacturing defect, and should be repaired by Remington.

RE: Model 700 Accidental Discharge Concern

Dear John,

We were sorry to learn of the unfortunate incident that you experienced while getting ready to fire your Model 700 rifle. We also apologize for the less than satisfactory treatment that you received by one of our authorized repair centers.

As we discussed, I have enclosed an ARS label for you to return the firearm to my attention for examination and repair. We have agreed to check the rifle over completely and make any necessary repairs at no charge, including installing a complete new trigger assembly. Please put a copy of this letter inside the shipping box. The note inside is important as sometimes the outside label gets damaged in transit and we want to be sure the rifle is logged in correctly.

If you have any questions feel free to contact me directly.

Sincerely,

Fred Supry

Attention: Service
Re: Model 700

I have had this model 700 for 36 years and have always had problems. If you look back in your records, you will see my complaints.

During hunting season the rifle would not fire, I was re cocking it 3 times and it still would not fire. I shot a small deer but don't worry, it's ok I did not kill it.

After cleaning it (the bolt) I took it to the range last week on May 15, 2006, loaded 1 round, closed the bolt and the rifle fired (miss fired). Not only was no one killed but I was thrown off my range. No need to tell you what the range coach yelled to me.

Now that you have my rifle help, you should keep it and trade me to a new 700ADL.

We are all lucky, play lotto this week!

Thank you,

Ron Gibbons

RF: Remington 700 SN S6519305

Customer claims that the rifle fired when he moved the safety from Safe to Fire. I could not duplicate this on the bench. I did not want to return it to him though just in case there was something wrong in the trigger/safety assembly. The trigger did not look to me like he had been trying to adjust it.

Regards,

H. H. Hastings

Howard Hastings

No matches were found.

Customer (Mark Hancock) - 01/31/2006 03:26 PM
I own a model 700 black powder rifle - 50 cal. While hunting this year, I felt something hit my leg and roll off into the leaves - I think it fell out of the trigger. I then noticed that the safety feels real loose - You can feel it 'click' into the fire or safe position. However, the safety can move back & forth and I don't think that the gun is safe to use. Is this something that your warrenty would cover and if so, where is the closest place to me that does Remington warrenty work - I live in Fairfax, Virginia. Thanks, Mark Hancock 703-385-8332

Also, Sometimes the gun will fire when moving the safety from the 'SAFE' position to the 'FIRE' position.

Factory Repair Form

Return to Previous Page

NOTE: Please complete and print this form, and then include it with your firearm.

Model Number: 700ml	**Serial Number:** ml016041	
Are you the original owner?: ☑ YES ☐ NO		
Name: doug schutter	**Date of Purchase:** first year offered	
Address (no PO Boxes): 739 union city rd		
City: coldwater	**State:** mi	**Zip:** 49036
Phone (Daytime): 517-849-1053	**Fax:** 517-849-9158	
E-mail Address:(if e-mail address is provided, notification of receipt and shipment will be sent) schutter@michigan.gov		
E-mail Address: ☑ I would like to receive future e-mail updates from Remington.		

Please describe your problem and date of ocurrence:

I have used this ml for hunting for several years without trouble. Last year I had several hair raising experiences including; pulling trigger without discharge, taking safety off with instant accidental discharge, lowering of the bolt without the sear catching (fireing pin gently lowering also). and accidential discharge when bolt was touched to open. These variables would change when the action was placed back into the stock from out of the stock but are very unreliable.

Have you reviewed the cleaning and maintenance recommendations on our web site or in our owners manual? [x] YES [ ] NO

When was the last time that your firearm was serviced by a Remington authorized repairman/gunsmith?) [never]

What were the services performed?) [ ]

NOTE: In order to better service our customers some firearms/parts are sent to a certified Remington Premier Authorized Repair Center.

Ship your INSURED firearm by either UPS or Parcel Post to:

Remington Arms Co., Inc.
Attn: Arms Service Division
14 Hoefler Avenue
Ilion, NY 13357

WARNING: DO NOT SEND LIVE OR SPENT SHELLS IN YOUR FIREARM OR IN THE SAME BOX WITH THE FIREARM. **THIS IS A VIOLATION OF FEDERAL LAW.** IF YOU FEEL YOU MUST SEND SPENT SHELLS PLEASE SEND THEM IN A SEPARATE PACKAGE AND INCLUDE NAME, ADDRESS (WITH ZIP CODE), TELEPHONE AND MODEL AND SERIAL NUMBER OF YOUR FIREARM.

:: Record the serial number of your firearm before sending it.
:: Pack your firearm for safety and to prevent further damage in shipping and handling. Preferably, ship in a firearm box. (Note: Original boxes may not be returned.)
:: Remove all accessories from your firearm to prevent loss or damage.
:: Provide a return address on both the outside and inside the box. Shipments without a proper return address will be refused.
:: Ship your INSURED firearm by either UPS or Parcel Post. Remington is not responsible for damage or loss during shipment, so you may elect to purchase insurance from your carrier.

Charge repairs will be processed using the following guidelines:

:: Repairs $75.00 and under will be completed and returned to you C.O.D. (To avoid C.O.D. Charges, please include your credit card number and expiration date with your gun)

:: For Repairs over $75.00, you will receive a written estimate detailing the nature of the repair, applicable taxes and shipping. You will have 30 days to approve the repair estimate. Repairs can be paid by check, money order, or credit card (American Express, Discover, MasterCard, or VISA). If you wish, you can expedite repairs over $75.00 by setting a pre-authorized amount that can be billed to your credit card.

Remington Firearms
11/28/2005

I have what I believe is a defective and dangerous Remington 700 ADL # 6871283. Please see the details as to what has happened with this gun.

Purchased the gun second hand 10/1990.

Same year as purchased, attempted to shoot the gun and when the trigger was pulled the gun did not fire. I released the trigger to look at the gun and in a matter of seconds WITH OUT the trigger being pulled, it discharged! I chambered another round and the gun fired again as soon as the bolt was closed. Again WITH OUT the trigger being pulled! (It was cold that morning and the gun had been in its case inside my truck overnight.) I lubricated the gun and hunted the remainder of the weekend without any further problems.

Upon returning from the hunt I had the gun cleaned and serviced by an amateur gunsmith. After cleaning the gun, he placed it in a freezer overnight and it worked fine and has worked fine ever since then until the present.

On 11/21/05, I was preparing to shoot at a deer with the gun. I had it laying horizontally across my lap as I put 2 cartridges into the magazine. (The safety was in the FIRE position as is necessary to open the bolt.) After chambering the cartridge, I attempted to put the safety in the SAFE position, but was unable to as it was stuck. I opened the bolt and placed the safety in the SAFE position and closed the bolt. After closing the bolt, I was looking at the gun trying to figure out why the safety had previously jammed. I decided to take the gun off SAFE and in the FIRE position. As soon as I did the gun immediately discharged WITH OUT the trigger being pulled! I

immediately inspected the trigger area to see if anything had come near the trigger that may have pulled it, but nothing had.

I have 10 Remington rifles / shotguns and am very fond of your products. This is the only gun I have ever had any problems with. I purchased this gun with the intention of passing it on to one of my two sons when they were old enough to have it, but I am now afraid to even use the gun myself for fear of it discharging again and possible causing a severe injury or death to someone. I would really like to have this gun be in a SAFE and USEABLE condition, but as it now, I would be afraid for anyone to use it!

Evidently, Remington felt the need to modify the safety's on the 700 where as the bolt can be opened with the safety in the SAFE position as two later versions I own have this function.

Would your company consider prolonging my use of this gun by upgrading the gun to the improved safety? I am very fond of this gun and I would hate to have to make it where it could never be fired again. Also, could there be a malfunction in ~~11/28/2005~~
the firing pin mechanism contributing to this problem?

Anything that could be done to keep this gun usable and in safe working order would be greatly appreciated!

Thank You,

Richard C. Jones

John Kramer
855 Squiresville Rd.
Owenton, KY 40359

Subject: Model 700 Serial number G6240119
RE: Case # 620

Dear Mr. Kramer,

We were sorry to learn of the unfortunate incident that you experienced while you and your daughter were out shooting. We are certainly glad that your injuries were not any more serious, and that you are anxious to get back to enjoying the shooting sports.

As we discussed, I have enclosed a prepaid UPS shipping label for you to ship the rifle back to our factory for examination and repair. I have also included a copy of this letter to put inside the shipping box. The letter inside is important as sometimes the outside label gets damaged in transit and we want to be sure the rifle is logged in correctly. On the factory repair form, please provide additional information about the incident, including the date of the last occurrence, type of weather, type of ammunition being used, etc.

We apologize for the inconvenience that this incident has caused and we hope that our actions will keep you as a loyal Remington customer.

Sincerely,

Laura Watson

Address (no PO Boxes): 1009 DAVIS RD WEST		
City: ODESSA	**State:** WA	**Zip:** 99159
Phone (Daytime): 509-982-9952	**Fax:**	
E-mail Address:(if e-mail address is provided, notification of receipt and shipment will be sent) troykissler@odessaoffice.com		
E-mail Address: ☐ I would like to receive future e-mail updates from Remington.		

Please describe your problem and date of ocurrence:

When switching from safety to fire the rifle will fire on its own. If you pull outward on the trigger this will not happen but if the trigger is bumped when the gun is on safety, and then the safety switch is moved to fire the rifle will discharge on its own. I have never had any work preformed on the gun or the trigger and I bought it new.
Way To Go Remington!!!
I have read about people getting killed and the law suits in the paper. Remington's excuses about keeping the gun pointed in a safe direction doesn't cut it for me.
If I even get charged for the shipping I think I'll throw up.

How often do you lubricate the action? (Months or Number of rounds)
How often do you lubricate the trigger assembly? (Months or Number of rounds)
Have you reviewed the cleaning and maintenance recommendations on our web site or in our owners manual? ☐ YES ☐ NO
When was the last time that your firearm was serviced by a Remington authorized repairman/gunsmith?)
What were the services performed?)
NOTE: In order to better service our customers some firearms/parts are sent to a certified Remington Premier Authorized Repair Center.
Ship your INSURED firearm by either UPS or Parcel Post to: **Remington Arms Co., Inc.** **Attn: Arms Service Division** **14 Hoefler Avenue** **Ilion, NY 13357**
ⓘ **WARNING:** DO NOT SEND LIVE OR SPENT SHELLS IN YOUR FIREARM OR IN THE SAME BOX WITH THE FIREARM. **THIS IS A VIOLATION OF FEDERAL LAW.** IF YOU FEEL YOU MUST SEND SPENT SHELLS PLEASE SEND THEM IN A SEPARATE PACKAGE AND INCLUDE NAME, ADDRESS (WITH ZIP CODE), TELEPHONE AND MODEL AND SERIAL NUMBER OF YOUR FIREARM. :: Record the serial number of your firearm before sending it. :: Pack your firearm for safety and to prevent further damage in shipping and handling. Preferably, ship in a firearm box. (Note: Original boxes may not be returned.) :: Remove all accessories from your firearm to prevent loss or damage. :: Provide a return address on both the outside and inside the box. Shipments without a proper return address will be refused. :: Ship your INSURED firearm by either UPS or Parcel Post. Remington is not responsible for damage or loss during shipment, so you may elect to purchase insurance from your carrier. Charge repairs will be processed using the following guidelines: :: Repairs $75.00 and under will be completed and returned to you C.O.D. (To avoid C.O.D. Charges, please include your credit card number and expiration date with your gun) :: For Repairs over $75.00, you will receive a written estimate detailing the nature of the repair, applicable taxes and shipping. You will have 30 days to approve the repair estimate. Repairs can be paid by check, money order, or credit card (American Express, Discover, MasterCard, or VISA). If you wish, you can expedite repairs over $75.00 by setting a pre-authorized amount that can be billed to your credit card.

TO: REMINGTON

This gun gave me trouble about a year after I got it. I shoot black powder and it gets very dirty. After that first year it started going off when I would go from safe to fire without touching the trigger. It can be very dangerous if you're not alert to the problem. If cleaned thouroly it does not happen. But as I said black powder is very dirty. It is clean now so you ma have to get it gritty to se what I mean. If you have any questions call 334-566-2180 or 225-281-3071. Thanks. My home address is 3767 west atchafalia LV. Road Krotz Springs LA. 70750.
The gun is a model 700 Muzzle loader ser: ML 099637.

Engadine, MI 49827

906-477-1059 - [redacted] evening
906-293-5508 - day

This gun is firing when you turn the safety OFF. It did this last year also, a gun smith tore it down & clean it up. The gun was fine for about 40 rounds. Trigger will get real STIFF & won't fire. This gun makes me real nervous, not sure I want this gun around anymore. I think Remington should replace it.

Thank you
Bryan Kovar

S		Concern:1008	Fired on Bolt Closing			
C						

11/20/06-Richard Morris was loading the magazine of his M/700 while in his friend's truck. One of the rounds fell into the chamber. He was going to extract it by closing the bolt to grab the round. Upon closing the bolt, the gun went off. It was cold, approx 10degrees. The round went through the floorboard and frame of truck. He is not looking to cover damages as his homeowner's insurance will cover this. He just wants to see what is going on with his rifle and get it taken care of.lw

Subject: Model 700 Serial# S6376880
RE: Case #637

Dear Mr. Morris,

We were sorry to learn of the unfortunate incident that you experienced while out hunting on Wednesday. We are certainly glad that everyone is alright, and that you are anxious to get back to enjoying the shooting sports.

As we discussed, I have enclosed a prepaid UPS shipping label for you to ship the rifle back to our factory for examination. I have also included a copy of this letter to put inside the shipping box. The letter inside is important as sometimes the outside label gets damaged in transit and we want to be sure the rifle is logged in correctly. On the factory repair form, please provide additional information about the incident, including the date of the last occurrence, type of weather, type of ammunition being used, etc.

We apologize for the inconvenience that this incident has caused and we hope that our actions will keep you as a loyal Remington customer.

Sincerely,

Laura Watson

Dear Sirs;

Please find enclosed a Remington 700 BDL rifle, serial #A6523301. Our customer is complaining that his rifle does not fire at times and sometimes it fires when he moves the safety to the fire position. I advised him that this rifle should be sent back to you folks for evaluation and repair as it is an older model. Please evaluate and repair as needed. Return it to us at the address above and thank you for your good work.

Sincerely,

John E. Long

To whom it may concern

I have owned this rifle for the last 17 years and my father bought it new in 1979. I have been hunting Coloborns with the Softly, Trigger for over five times now wife hunting I have taken the gun off safety and it will not fire. I also have had twice take the gun off safe to shoot no fire. Then three Softly backon then back off and rifel would fire On its own. On Nov 18 2005 it happend a gain but this time the Softy Stuck on fire, and I could not get it off in the field.

Thank You for what ever You can do for me

Eric Brady

Remington Firearms Company:

Please fix the Remington model 700 Rifle, Sr Number E6778484

The problem is that the weapon is slam firing. When the bolt is turned upright and then returned into the locked position the sear disengages allowing the firing pin to travel forward. This constitutes an unsafe condition.

Please call if you have any further questions.

Thank You

E-mail Address: DWESOL@MILWAUKEE.GOV ☒ I would like to receive future e-mail updates from Remington.		
Please describe your problem and date of ocurrence: DURING A REGULAR MONTHLY TRAINING SESSION THE RIFLE FIRED AS A ROUND WAS CHAMBERED. THE ROUND WAS FED FROM THE MAGAZINE. THE ROUND FIRED AS THE BOLT HANDLE WAS BEING CLOSED. THIS RIFLE HAS BEEN ASSIGNED TO THIS OFFICER SINCE 1989. THE OFFICER IMMEDIATELY NOTIFIED ME. I WITNESSED THIS HAPPEN TWO MORE TIMES. WEATHER CONDITIONS AT THE OUTDOOR RANGE WAS LIGHT SNOW, 9°F. VERY COLD. 12-5-05. WE HAVE 20 RIFLES ABOUT THE SAME AGE. I NEED TO KNOW IF THIS IS AN ISOLATED PROBLEM, OR WHAT WORN PART NEEDS REPLACEMENT. THANKS.

What were the services performed? BOLT DISASSEMBLY AND CLEANING. STOCK TO
ACTION PROPER TORQUE. RELIEF OF STOCK MATERIAL THAT TOUCHED BARREL.
Ship your INSURED firearm by either UPS or Parcel Post to: **Remington Arms Co., Inc.** **Attn: Arms Service Division** **14 Hoefler Avenue** **Ilion, NY 13357**
⚠ **WARNING:** DO NOT SEND LIVE OR SPENT SHELLS IN YOUR FIREARM OR IN THE SAME BOX WITH THE FIREARM. **THIS IS A VIOLATION OF FEDERAL LAW.** IF YOU FEEL YOU MUST SEND SPENT SHELLS PLEASE SEND THEM IN A SEPARATE PACKAGE AND INCLUDE NAME, ADDRESS (WITH ZIP CODE), TELEPHONE AND MODEL AND SERIAL NUMBER OF YOUR FIREARM. :: Record the serial number of your firearm before sending it. :: Pack your firearm for safety and to prevent further damage in shipping and handling. Preferably, ship in a firearm box. (Note: Original boxes may not be returned.) :: Remove all accessories from your firearm to prevent loss or damage. :: Provide a return address on both the outside and inside the box. Shipments without a proper return address will be refused. :: Ship your INSURED firearm by either UPS or Parcel Post. Remington is not responsible for damage or loss during shipment, so you may elect to purchase insurance from your carrier. Charge repairs will be processed using the following guidelines: :: Repairs $75.00 and under will be completed and returned to you C.O.D. (To avoid C.O.D. Charges, please include your credit card number and expiration date with your gun) :: For Repairs over $75.00, you will receive a written estimate detailing the nature of the repair, applicable taxes and shipping. You will have 30 days to approve the repair estimate. Repairs can be paid by check, money order, or credit card (American Express, Discover, MasterCard, or VISA). If you wish, you can expedite repairs over $75.00 by setting a pre-authorized amount that can be billed to your credit card.

Subject: Defect in 700 Remington Rifle 270 WIN # E6685194

To Whom It May Concern:

Last week I spoke with a Customer Service Represenative of your company about the following defect in my rifle. I am returning for repair or replacement as discussed.

1.) When releasing the safety switch to fire, the gun will automatically fire without touching the trigger.

All I have attempted to do is pour a little oil into the chamber, which had no results in solving the problem.

Thank you,

James D. McArthur

Fred,
Gun being returned from Maschmedt & Assoc. 700 XCR 7mm
Gun owned by a member of Leupold's staff,,,,was in Canada on moose hunt....gun fired on bolt closing on 2 occasions.
Do not know if gun was on safe or fire when this occurred.

Bryson French who is our rep called me & has the gun in his possesion

Comments: You sent ME a new BOLT in 1998. ~~With Factory~~ I had NO problems after new Bolt

When was the last time that your firearm was serviced by a Remington authorized repairman/gunsmith?

What were the services performed? None

Ship your INSURED firearm by either UPS or Parcel Post to:

REMINGTON ARMS CO., INC

ATTN: Arms Service Divison
14 Hoefler Ave
Ilion, NY 13357

WARNING: DO NOT SEND LIVE OR SPENT SHELLS IN YOUR FIREARM OR IN THE SAME BOX WITH THE FIREARM. **THIS IS A VIOLATION OF FEDERAL LAW.** IF YOU FEEL YOU MUST SEND SPENT SHELLS PLEASE SEND THEM IN A SEPARATE PACKAGE AND INCLUDE NAME, ADDRESS (WITH ZIP CODE), TELEPHONE AND MODEL AND SERIAL NUMBER OF YOUR FIREARM.

:: Record the serial number of your firearm before sending it.
:: Pack your firearm for safety and to prevent further damage in shipping and handling. Preferably, ship in a firearm box. (Note: Original boxes may not be returned.)
:: Remove all accessories from your firearm to prevent loss or damage.
:: Provide a return address on both the outside and inside the box. Shipments without a proper return address will be refused.
:: Ship your INSURED firearm by either UPS or Parcel Post. Remington is not responsible for damage or loss during shipment, so you may elect to purchase insurance from your carrier.

Charge repairs will be processed using the following guidelines:

:: Repairs $75.00 and under will be completed and returned to you C.O.D. (To avoid C.O.D. Charges, please include your credit card number and expiration date with your gun)

:: For Repairs over $75.00, you will receive a written estimate detailing the nature of the repair, applicable taxes and shipping. You will have 30 days to approve the repair estimate. Repairs can be paid by check, money order, or credit card (American Express, Discover, MasterCard, or VISA). If you wish, you can expedite repairs over $75.00 by setting a pre-authorized amount that can be billed to your credit card.

Subject: Two ARS labels

1/12/2007

Please send two ARS labels to:

Michael Miller
5144 Chateaugay Drive
Mason, OH 45040

1. While cycling his reloads through his rifle he had one go off – He was in his cellar and it shot through the floor above him, through a table, and wall. He is ok except for some ringing in his ears and a minor bruise on his leg where the stock was resting. He said he went on the internet and found out that Remington has a problem with these rifles. I explained that there is usually an underlying issue, i.e., improper maintenance, alterations, etc. Date of incident was 1/6/2007. Model 700 rifle with the bolt lock style safety.

2. He has a Model 722 that he would like to return for the bolt lock modification program. No issues with this gun – just would like to be able to load and unload with the safety on.

His phone # is 513-398-5998.

Subject: Model 700
RE: Case #924

Dear Mr. Miller,

We were sorry to learn of the unfortunate incident that you experienced while shooting your Model 700. We are certainly glad that your injuries were not any more serious, and that you are anxious to get back to enjoying the shooting sports.

As discussed with Fred Supry, I have enclosed a prepaid UPS shipping label for you to ship the firearm back to our factory for examination and repair. I have also included a copy of this letter to put inside the shipping box. The letter inside is important as sometimes the outside label gets damaged in transit and we want to be sure the rifle is logged in correctly. On the factory repair form, please provide additional information about the incident, including the date of the last occurrence, type of weather, type of ammunition being used, etc.

We apologize for the inconvenience that this incident has caused and we hope that our actions will keep you as a loyal Remington customer.

Sincerely,

Laura Watson

Remington®

January 16, 2007

Michael Miller
5144 Chateaugay Drive
Mason, OH 45040

Serial Number: 249889
Model: 700
RE00124661

Subject: Model 700
RE: Case #924

Dear Mr. Miller,

We were sorry to learn of the unfortunate incident that you experienced while shooting your Model 700. We are certainly glad that your injuries were not any more serious, and that you are anxious to get back to enjoying the shooting sports.

As discussed with Fred Supry, I have enclosed a prepaid UPS shipping label for you to ship the firearm back to our factory for examination and repair. I have also included a copy of this letter to put inside the shipping box. The letter inside is important as sometimes the outside label gets damaged in transit and we want to be sure the rifle is logged in correctly. On the factory repair form, please provide additional information about the incident, including the date of the last occurrence, type of weather, type of ammunition being used, etc.

We apologize for the inconvenience that this incident has caused and we hope that our actions will keep you as a loyal Remington customer.

COULD NOT DUPLICATE CONCERN.
Check gun over completely
Clean and install new TA
under the bolt lock modification
program. N/C
Charge 230145
FCS 2/9/2007

Sincerely,

Laura Watson
