Dear Sir:

I am returning this model 7, .223 Rem. (serial # S7618494) because of the weapon discharging unintentionally. I had numerous discharges when placing the safety on "fire", this occurred after loading the firearm, placing the safety "on" and testing the trigger. I also experienced a number of unintentional discharges when opening the bolt. This firearm was bought new and is unaltered. I have shot approximately 30 rounds through it to date.

Please remedy these unsafe problems that I have experienced with this rifle and return to me as soon as possible. Do not hesitate in contacting me if I can be of further assistance.

Sincerely yours,

Phillip Ames
