

Dear Mr. Dennis Janita

My name is Eugene Askin. I spoke to you recently on the phone about my Remington Model 700ML Black powder gun. It is unsafe and the accuracy is very poor. You told me to write you a letter reminding you of the phone conversation and what is wrong with the gun. The first thing is the gun sometimes shoots off without pulling the trigger. I had the gun shoot off one time when I released the safety button. The other problem is the accuracy of the gun is very poor. My brother's Remington shoots a 2 to 3 inch group at a hundred yards and we both shot off a bench rest. My gun at 50 yards shoots all over and at a hundred yards it sometimes don't even hit the target. I shoot everything from Remington to Night Hornady and Thompson Center bullets all grains with Black powder and even tried Pyrodex and I spent around \$150.00 on everything and

(P2)

My gun wouldn't group any of these bullets with Black powder or ~~any~~ pyrodex at all. You told me that you could fix the trigger but not the accuracy. So you told me to send you the gun back to you and because of the problems I have with the trigger and the accuracy you said that you can't fix the accuracy so you said that you would send me a new gun back with the same serial number on it and destroy the old one. What I also want to know is since you are sending me a new gun, to save me time, instead of ordering it later, how much would it cost me for you to put a Mossy oak stock on the new gun that you said you would send me? Please call me to let me know the cost.

Thank you
Eugene Ciskis

Phone # (609) 464-9213

Serial # of my gun ML 005700

Address 640 Helena Ave. MANTUA N.J. 08051
