STOMER'S REQUEST *See on bolt closing*

IN FAULT *Cannot duplicate complaint. However, trigger assembly has been adjusted outside of factory. Trigger pull manual at 2 1/2 pounds - this is below our minimum spec; over travel is excessive; rear engagement does not alter, but appears O.K. Removal of barrel-action from stock revealed not on bottom of barrel, on action and on trigger assembly. See lift, O.K.*

Clean up action & barrel, replace trigger assembly at N/C, as gesture of good will

Please expedite, per K.O.G.
