Huntington ARMS Co.

7/6/9

Ferry,

We spoke recently  
over the phone about the  
problem my Model 7FS has.  
The problem is that during  
cold weather the rifle  
will go off as soon as  
safety is released.  
This problem only occurs  
during cold weather. I've  
never had this rifle  
serviced or attempted any  
modifications on my own.  
I've never done more  
than wipe down its exterior  
with a silicon cloth and

clean the bore.

Would you please make  
the proper repairs and  
return the rifle and bill  
to me upon Completion

Thank you

James Densmo
