Dear Sir,

I have shipped to you a Remington
rifle Model 700 Caliber 6 M.M. serial number
6435-318 for repair.

The problem with the above rifle is at
times when the operator chambers a Cartridge,
the rifle fires that Cartridge without
pulling the trigger. It does not do it every
time, but he is afraid to hunt with it like
it is. He says it has been doing this
rarely but enough for him to be afraid
of it. I told the gun owner I was sure
that the kind of people you were, that
you would make it right.

Thank you,
Shem J. Holland Sr.
