

8/22/97

Dear: Surs

I am sending my rifle to you for repair or replacement. While shooting ~~prairie~~ prairie dogs in Wyoming, it didn't fire. When I lifted the bolt to open it and it fired on its own. I then loaded another round and it wouldn't fire with the bolt all the way closed, but if the bolt was up about $1/4 - 5/16$ it would, sometimes on its own. I cleaned the action and the bolt and found no problems, then reassembled the gun and it still wouldn't fire without the bolt lifted up. The bolt also seemed to be hard to open, with or without the shell being fired.

MODEL: 700 VS SF

CAL: 22-250

SER #: 56291596

ORDER #: 29743

SHOT: 300-350 rds

PURCHASED: 11/96

Any Questions
Call.

WORK (208) 523-6220 EXT. 222

Thanks

JASON ELDRIDGE
