CUSTOMER'S REQUEST	GUN FIRED WHILE UNLOADING				

MAIN FAULT
Cannot duplicate complaint, rifle cannot be made to malfunction. However, trigger assembly has been properly adjusted out of factory, as evidenced by foreign solvent on adjusting screws - 1) trigger pull below min. spec. at 2 1/2" 2) excessive overtravel, 3) insufficient sear engagement. Trigger is rusty also. Sear engagement lift .010"

Note: *Stock broken at pistol grip. as received mag. box not properly seated in action - may have caused cracked stock*

Send again quotation for 1) stock and 2) new trigger assembly - \$ price as gesture of good-will.
