Sir:

I would appreciate it if you would take a look at my rifle. The safety
cks sometimes and then sometimes when you take it off safe, the trigger
cks. Then when you touch the safety, the gun fires. Very dangerous, don't
think. Some local gunsmith worked on it and said he fixed it, but as you
see I should have sent it to you in the first place.

I would appreciate it if you could fix it. Let me know what you can do,
if you need anything.

Sincerely,

Doug Melton
