

11/8/98

Dear Sirs:

Please check this gun and repair. It has only been used for 1 season. It has several problems:

#1: It appears to have excessive headspace. I have enclosed 3 empty cartridges. They have rings on the upper part of the case.

#2: Case expansion has caused extraction to be difficult. It appears that some of the extractor on the bolt has been broken off.

#3: There is a problem with the trigger and safety. The gun will detonate cartridge when bolt is closed if safety is off.

Thank you
