This Fire arm was won
@ a raffle at an Elk Foundation
Banquet April 12 2003 in
Craig Co.

Bipre take it out to range ~~see~~ I
had a muggle Beak added to
this gun as it was won by my
wife. And that is the only
thing added or changed to this
gun. That I am aware of.

this gun was fired 15 times at
a shooting range with the
gun always on a bench rest.
I do not know that the safety
was always on while putting
a round into the chamber,
there were no problems at all
Experienced and it shot very
well.

In the only 2 hunting
outings my wife had this
gun out. It ~~meant~~
was fired on both
occasions. Both times it
was putting around into
the chamber. Left hand
was on the fore arm of stock
a right hand was operating
the bolt. Best guess ~~it was~~
that the gun was at an
approx 60° to 45° angle
while entering 2nd round
fire arm went off. Safety
was off during ~~the~~ both
shooting occasions. the
Rounds were Remington
factory ammo. 4 grain.
No mud or snow present.
Please let us know your
findings
