GENTLEMEN:

I HAVE A MODEL 700 LH RIFLE IN 7 MM MAG CALIBER. THIS RIFLE FIRED BY ITSELF WHEN I TOOK IT OFF SAFE TO UNCHAMBER THE ROUND. THANKS TO CAREFUL SAFETY PRACTICE THE RIFLE WAS POINTED STRAIGHT UP. I COULD NOT UNDERSTAND WHY IT FIRED (SCARING MY COMPANIONS AND CAUSING ME CONSIDERABLE EMBARRASSMENT). ONE PERSON DECIDED NOT TO HUNT WITH ME ANYMORE. THE MAY 23RD ARTICLE IN BUSINESS WEEK EXPLAINS WHAT PROBABLY HAPPENED.

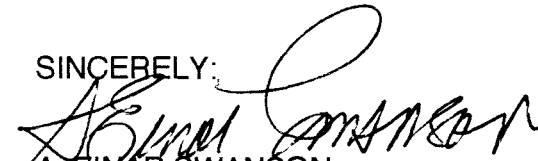

WHAT MODIFICATIONS ARE REQUIRED TO :

1. PREVENT UNINITIATED FIRING?
2. ALLOW THE BOLT TO BE OPENED WITHOUT THE "SAFE" LEVER IN THE FIRE POSITION ?

THIS IS A FINE SHOOTING RIFLE BUT I CANNOT USE IT UNLESS IT IS REPAIRED. MY CONSCIENCE WILL NOT ALLOW ME TO SELL IT IN ITS PRESENT CONDITION.

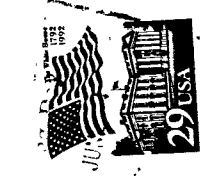

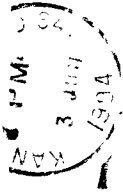

LOOKING FORWARD TO HEARING FROM YOU.

SINCERELY:

A. EINAR SWANSON
