

THE TRIGGER DID NOT SEEM TO WORK AT ALL. IT DID NOT MOVE AND DID NOT NEED TO BE PULLED TO FIRE. WE THEN TRIED THE SECURITY SYSTEM. KEY BACK AT CAMP. THE GUN SEEMED TO RETURN TO NORMAL OPERATION ONCE THE KEY WAS TURNED FULLY TO THE ENGAGED POSITION AND THEN BACK TO THE FIRE POSITION. THIS WORKED FOR A COUPLE OF ROUNDS AND THEN THE PROBLEM OCCURED AGAIN. ONCE AGAIN THE SECURITY KEY SEEMED TO RETURN IT TO NORMAL OPERATION. WE ALSO NOTICED THAT THE BOLT WOULD CLOSE WITH THE SECURITY SYSTEM ENGAGED EVEN THOUGH THE MANUAL SEZ THAT IT SHOULD NOT. THE GUN HAS HAD 16 ROUNDS FIRED SO FAR.

I WOULD ALSO LIKE TO KNOW IF THE MAGAZINE CAN BE TIGHTENED UP SOME HOW? IT RATTLES WHEN YOUR WALKING THROUGH THE WOODS. NOT EXACTLY HELPFUL WHEN HUNTING.
