Dear Sirs,

I have sent you my 700 Remington 30-0-6. When I put a shell in the chamber it fires without touching the trigger. I first took it to "The Shooting Shack", a gun store in Riviera Beach, Florida for repair. They informed me that they sent the rifle to you and you returned it saying there was no problem with it. However, I am still experiencing difficulties with it. Please repair it and send it to the address below.

Thank You,

Larry Toney
