These 600 Trigger assemblies are going to be an issue. We have none. Maybe the Field Service guys could contact RARCs and see if they have any available. If so maybe we could get some back from them.

Dear Sir,

Enclosed is my Remington 600 rifle (serial #59036) for repair based on a "recall" for misfire with bolt closure.

This weapon was gifted to me in 1967 from a dear friend in Toledo, Ohio, so I do not have a purchase receipt. I am the single owner.

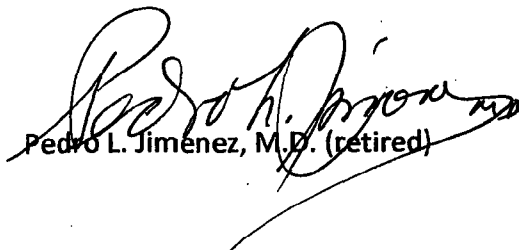

After a few hunting seasons, the rifle was stored for approximately 30+ years until I loaned it to a former friend 3 years ago; and it was recently returned to me at my strong request. Without my permission he removed a special mounted scope, the sights, modified the trigger and generally did not care for the gun to my disappointment.

Upon return of the weapon I took it to Carter Country here in Houston, Texas, to begin restoration. It was their gunsmith who informed me of the recall. As it so happened, I had had two incidences of misfiring when loading the chamber but did not realize it was a "recall" issue.

Carter Country did dismantle the woodstock from the barrel for me and the woodstock has been refinished by my son-in-law. After the recall repair I intend to continue the restoration to a functioning, usable rifle with front and rear sights (on order) and a new scope.

Thank you for your assistance in advance. I hope to have many years with the restored gift.

Sincerely,

Pedro L. Jimenez, M.D. (retired)
