Dear Mr. Mercer,

You will receive a pre-paid shipping label in a separate email. Please fill out the form that is included with this letter.

Please include a copy of this letter & our form to put inside the shipping container. The letter inside is important as sometimes the outside label gets damaged in transit and we want to be sure the firearm is logged in correctly. Mark the ends of the box with "Product Service". Product Service will be inspecting the firearm and will contact me with the results.

I hope that this action will keep you a loyal Remington customer.

Sincerely,
D. Fulcher

Gentlemen:

I responded to your request for information concerning my defective Model #721 Remington Rifle on 10/29/2010. I sent the message again on this date. The information is repeated below:
My model #721 is a Remington Caliber 30-06 Sprg, Serial #177108. I will be pleased to return my weapon to Remington for repair, via UPS upon receipt of a pre-paid shipping label; however, I do not have an adequate shipping container to preclude the weapon being damaged in shipment. Further, the weapon has a scope on it. Should I remove the scope prior to shipping? If you require any further info, please feel free to call me at 717-352-2880.

Response (Dell -)

11/02/2010 08:54 AM

Dear Mr. Mercer,
We would like the rifle to come into our Product Services Department at our factory for examination. Please reply back to me with the serial number of the rifle, caliber, your mailing address and phone number. We would like to send you a pre-paid shipping label for UPS to have the firearm come in. I will also include a form that you can fill out to let the examiner know exactly what happened, when this occurred and what you are expecting.

Sincerely,
Dell

Customer (Jim Mercer)

10/23/2010 12:56 AM

Gentlemen:

I have a model 721 Remington rifle that I inherited from my father. Only recently have I examined the rifle. While cleaning the weapon I noticed a couple of potentially dangerous problems with the weapon. When the safety was on and I cocked the rifle and took the safety off, the firing pin was activated without touching the trigger. Further, with the safety off, when I moved the bolt to the rear as to eject a shell, the firing pin was activated without touching the trigger. I'm confident that my father never used the weapon or he would have pointed out these defects. Please advise.

10/26/10 Per email from Moline sent to the Remington site, incident # 101021-000014, "I have emailed you in the past about my Remington Model 721 rifle explaining how it fired a round into the ground when my father was unloading it. It fired as soon as he released the safety and his finger was not on the trigger. I know this because I was right next to him and saw exactly where his finger was placed. The round that was discharged came within 12 inches from hitting me in the foot. I thank God that I was not hurt. This happened in November of 1956, when I was 16 years old, but it still makes me nervous when I think about it. You never did answer my question in that last email about what might have caused the rifle to go off by itself. I have been hesitant to shoot it since my father purchased it in 1949 and I would like to return it to you."cm
