Mr. Olden,

We did not mark your incident as Solved. It may be something our system does, but I had asked for your information to be able to get your gun back in for exam.

We would like the rifle to come into our Product Services Department at our factory for examination. Please reply back to me with your mailing address. We would like to send you a pre-paid shipping label for UPS to have the firearm come in. I will also include a form that you can fill out to let the examiner know exactly what happened, when this occurred and what you are expecting.

I have a model 721 rifle .270 s/n 92797 built 1949. I purchased this rifle 1959. Question? I have never had this rifle fire with a live round in the chamber, when the safety was released. BUT I have had this happen with the safety release and no round in the chamber. I can open the bolt with the safety on and than close the bolt, at times after doing this and the safety is pushed forward the firing pin has gone forward. It does not do this every time. Should this weapon be sent in for a safety check? I do not feel like I should use it again until it is made safe. When and where should it be sent? Does the stock or scope need to be removed before shipping? Please reply Thank you Tom Olden, Colorado springs ,Colorado

Dear Mr. Olden,

You will receive a pre-paid shipping label in a separate email within 24-48 hours. Please include a copy of this letter to put inside the shipping container. The letter inside is important as sometimes the outside label gets damaged in transit and we want to be sure the firearm is logged in correctly. Mark the ends of the box with "Product Service". Product Service will be inspecting the firearm and will contact me with the results.

I hope that this action will keep you a loyal Remington customer.
