10/4/11: Customer called. He said that his rifle had a FSR on 10/1/11. No damage, No injury. He said he needed the gun back for a hunt in 2 weeks and wanted us to fix the problem. He said he may take it to a Gander Mtn store nearby but he just wants them to fix the trigger problem so he can hunt. He said that he read an article somewhere stating that Remington knew there were issues with the trigger but we were too cheap to fix it. He asked if he should take the other 3 Model 700's out & see if they would fire & would it take the rifle killing someone to make us fix the trigger problem. He refused the pre-paid shipping label to get the rifle into the factory for exam. He said he may just buy a trigger from somewhere & replace the one he has in the rifle. df
