Repair/Replacement Cost	Repair/Replacement Date

12/20/11 Per Ilion, could not duplicate at bench. Trigger pull set below minimum specs. Trigger return minimal. Can replace TPA, clean, test fire at no charge. D. Evans has left a message for a Labonte rep to contact him to resolve.cm 12/21/11 Per D. Evans: We are getting a replacement gun. The 700 can go to wip. The replacement is being ordered on an SNC and will deliver to Madison for him to pick up. We will need to close out the repair accordingly. Engineering just called me: Trigger dimensions and parts within spec. Trigger pull had been reduced to the point that there was very little engagement with the sear. In the fire position the trigger pull spring had virtually no tension at all on it. Trigger set screw had been moved 30,000 th's which is one complete revolution. Max movement should have been less than 20,000th's.
