Dennis Crabtree
345 Pleasant Valley Ln.
Oneida, TN 37841
Phone: 423-286-6326

Ref # 9608, Model 700, Serial # A6422394

Enclosed is a prepaid UPS shipping label to cover shipment of your firearm to our factory. This shipping label is for a UPS Hub or UPS Terminal or a UPS driver can scan the label and ship the package for you. A box will arrive separately.

Please include a copy of this letter and service request to put inside the shipping container. The letter and service request inside are important as sometimes the outside label gets damaged in transit and we want to be sure the firearm is logged in correctly. Mark the ends of the box with "Product Service". Product Service will be inspecting the firearm and will contact me with the results.

Sincerely,
Dell Fulcher

■ **What is the purpose of the study?** The purpose of the study was to determine the prevalence of *Salmonella* in the feces of dairy cattle in the United States.

■ **What is the study design?** The study was a cross-sectional survey.

■ **Where was the study conducted?** The study was conducted in 10 states: California, Colorado, Connecticut, Florida, Georgia, Illinois, Indiana, Michigan, Minnesota, and New York.

■ **What is the study population?** The study population was dairy cattle in the United States.

■ **What are the variables?** The variables were the prevalence of *Salmonella* in the feces of dairy cattle and the risk factors for *Salmonella* infection.

■ **What are the results?** The prevalence of *Salmonella* in the feces of dairy cattle was 1.1%. The risk factors for *Salmonella* infection were age, sex, and breed.

■ **What are the conclusions?** The study concluded that the prevalence of *Salmonella* in the feces of dairy cattle is low, but it is still a public health concern.

■ **What are the implications for practice?** The study implies that dairy cattle should be monitored for *Salmonella* infection, and the results should be used to develop control measures.

■ **What are the limitations of the study?** The limitations of the study were the small sample size and the cross-sectional design.

■ **What are the strengths of the study?** The strengths of the study were the use of a standardized protocol and the inclusion of a wide range of dairy cattle breeds.

■ **What are the future research directions?** Future research directions include conducting a larger study with a longitudinal design and investigating the role of *Salmonella* in dairy cattle health.

■ **What are the key words?** The key words are *Salmonella*, dairy cattle, feces, prevalence, and risk factors.

■ **What are the references?** The references are the following:
