This rifle may discharge when loaded and the safety is released. 4 years ago this rifle would discharge when locking the bolt. I took it to a gunsmith who cleaned it. It was all right for a year (5 shots). It started to discharge sporadically when the safety was released. I took it to another gun smith who cleaned and adjusted it. It was okay for 2 years (10 – 12 shots). During the 1999 hunting season it started discharging when the safety was released. I'm very concerned with this Remington Rifle as it is going to hurt someone. I trust you can fix or replace it so I can hunt with it with some assurance that it won't discharge when it's not suppose to. Please let me know what you intend to do.

Thank you,

Donald J. Beach
