

MODEL 720 - IMPROVEMENT TO SAFETY MECHANISM

Shipment of guns was immediately stopped when this condition was discovered.

The difficulty has been corrected and we have a sample gun, ID-169, Serial #40895, submitted by Ilion, indicating the improvement. The gun has been thoroughly tested at Ilion and at Bridgeport.

SUGGESTED APC DECISION:

This change to the safety mechanism is approved and guns as represented by the production sample are approved for shipment.
