

Mr. Les Borman
LB Borman
Cody, Wyoming

February 8, 1961

Dear Les:

I am sure the season will be fine with me; just let me know.
The M/40X Center Fire is essentially identical to the M/40X
star fire. I will finally take the receiver for your bench rifle over to Clyde
Hart and have him make the receiver which I delivered to him some time ago
was used for another job.

I will probably use a new M/700 in whatever caliber you suggest.
below 30 caliber. The M/700 is our new custom design M/721 which I am
sure you would be interested in seeing when it is available.

Thank you very much for your inquiry. We look forward to
receiving your inquiry some cold weather here too, as low as 25° below
zero in the valley. We have had 12° below at our place up on the hill.

Sincerely,
Will decide about the sleeping bag when the time comes.

Best regards,
M. H. Walker, Supervisor
Rion Research Division
