Magazine

	both fixed staggered box	
type:		
fabrication:	folded	folded and spot welded
material:	sheet steel	sheet steel
retention:	screw-attached to receiver	friction fit in corresponding receiver cut
color:	black oxidized	black oxidized
follower:	nickel plated steel stamping	stainless steel casting, apparently tumble polished (not colored)
magazine spring constraints:	upper end of spring is well constrained in follower; lower end of spring constrained only by confines of magazine well in stock	upper end of spring is well constrained in follower; lower end of spring is retained transversely in stamped plate, plate outline same as magazine box - thus plate is constrained both longitudinally and transversely within magazine well in stock
