ANNUAL RESEARCH DEVELOPMENT REPORT

ARMS DESIGN

M/700 CLASSIC

There is a developing trend in the market for a more traditionally styled rifle. The Remington M/700 Classic rifle has been developed so that we can offer the customer, who wants a traditionally styled rifle, a Remington product. The majority of the development involves restyling the stock.

M/600 CARBINE

Marketing has requested that we reevaluate our bolt action line with respect to adding a carbine to our line. We propose to face lift the Mohawk 600 rifle with new styling and a new image to satisfy the product requirements. The proposed rifle will be ideal for deer hunting; short, light and fast handling.

M/700 - M/600 FIRE CONTROL IMPROVEMENTS

We are working on an improved fire control assembly for the Mohawk 600 and M/700 rifles. The design will give us definite product advantages at reduced manufacturing costs.
