Ilion, New York 13357

Dear Sir:

I have just received word from Mr. Rostahar of Arms Service Division that our order for Model 700 sear safety cams has been put on hold. We have been purchasing this part for approximately fifteen years for use in our 2 oz trigger, which we originally made for Remington Arms. This was in joint agreement with Remington at the time.

If there is anything you might do to alleviate this situation for us I would certainly appreciate it as I am in need of a number of them for our 2 oz. trigger.

Thank you for your attention in this matter. I will patiently wait your reply.

Yours truly,

Wallace E. Hart
