From C. B. WORKMAN

AGENDA FOR BOLT ACTION PROGRAM REVIEW

- A. Review design features of each model (A, ADL, BDL, M-7 Carbine). Identify those items requiring invention. Have samples where possible.
- B. Review relative cost effects of each feature with respect to cost of current model.
- C. Discuss schedule for accomplishing objectives. Emphasize choke points and critical path items, including machines and tooling.

Note: If time is available we will be prepared to discuss the Competition Trap and the XSG.
