### **KWIK KLIP CONVERSIONS**

Mag-Con, Inc. is proud to introduce a long overdue product for bolt action rifle enthusiasts called KWIK KLIP.

Four years of careful design and development has produced an alternative to breechloading and floorplate unloading that now adds "efficiency" to the accuracy of the world's finest bolt action rifles.

Our first production model, KWIK KLIP 700, is a positive loading system for Remington 700 BDL, 700 ADL, 700 Classic and 721 rifles in right hand or left hand actions. KWIK KLIP 700 easily replaces the factory trigger guard and floorplate assembly on 700 BDLs and 700 Classics (in minutes) without any special tools or skills. Installation in a 700 ADL or 721 requires the services of a qualified gunsmith.

KWIK KLIP 700 consists of a precision cast-high strength aluminum alloy trigger guard and an all-steel detachable clip magazine. The KWIK KLIP 700 trigger guard matches the factory inletting perfectly and is superbly polished and black anodized. The richly-blued steel clip holds four rounds (three in magnum calibers) and snaps instantly and securely in place when loading. The bottom of the clip is neatly contoured and does not protrude below the stock as in most clip-fed rifles. One touch of a finger on KWIK KLIP's patented latch and you're quickly and safely unloaded. The KWIK KLIP latch is also located outside of the trigger bow for added safety and convenience.

KWIK KLIP 700 is available right now in the following calibers: 25-06, 270 Win., 7mm Express, 30-06, 7mm Remington Magnum, 264 and 300 Winchester Magnum. Extra clips are available. KWIK KLIP conversions for short action Remington 700, Winchester 70, Ruger 77 and others will soon be available.

KWIK KLIP's patented design, superior finish, and quality construction are an "asset" to every hunter and gunowner who wants an easier, safer, and more convenient method of loading/unloading and yet retain the classic appearance of a bolt action sporter.

KWIK KLIP 700 retails for \$49.95 and extra clips are \$14.95. Contact your dealer, gunsmith, or write to Mag-Con, Inc., P.O.Box 2047A, Allentown, PA 18001. KWIK KLIP conversions are made in the U.S.A. under U.S. Patent No. 4,237,638.
