RE: MODEL SEVEN LIGHTWEIGHT
FLOOR PLATE LATCH BLANK C-92254

This model is experiencing functional problems related to the present design of the Floor Plate Latch. A redesign of this part is anticipated. It is recommended that:

- o The "hold" placed on your tooling vendor (to rebuild broken tooling) remain in effect.
- o No additional blanks be produced to the current design.

Per our conversation this morning, I will review the proposed redesign with you as soon as a marked-up print or prototype part is available.
