REPORT ON AD HOC FIREARM PRODUCTS COMMITTEE

Just a note of thanks for your participation on our Committee. On 11/17 I had the opportunity to review for the Staff the results of our efforts. I used the attachments contained in Tom Rawson's memo of 10/11/82, of which you have a copy. Our ideas were very well received and Ed Barrett asked me to pass along his thanks.

Marketing is presently reviewing our list of ideas and will respond. It was decided in the meeting to move ahead as soon as possible on the new chamberings for the XP-100 and to adopt our suggestions to drop selected M-700 scope block and sights and slings. In addition, the staff wants to see the sample of long eye relief scope mounted for slug guns.

We successfully generated a great deal of discussion and thought about our ideas and I am sure that we will see many of them implemented. Thanks again for your help.
