MODEL SEVEN UPDATE - STATUS

In our continuing program to maximize consumer response to the Model Seven update, we have begun to contact dealers by phone. Since the response from the field has slowed down, we feel that it is now time to call dealers. We have contacted all dealers who hold more than 3 un-updated rifles. We are continuing the phone call program by contacting all dealers holding 2 or more guns. After this we will contact dealers holding single guns.

Many dealers report work is done already or guns have sold through. They are providing names of the new owners and we will contact them by certified mail as is our standard procedure. If the guns are reported done, we will contact the warranty shop for confirmation.

Effort to get all guns updated will continue at a high level.
