The proposed ANSI/SAWC standard dealing with drop and jar-test tests has finally reached the end of the first canvass period. As you will recall, we previously reported that four individuals' objected to material in the proposed standard.

Enclosed is a copy of the proposed standard with the deletions lined out and the additions and/or changes shown in *italics*. The Task Force felt that all of these changes should be shown to assist you in reviewing their work.

If there are any questions, please feel free to contact this office for clarification.

Sincerely,
Paul E. Reich
