EXPLAIN IN DETAIL THE REASON FOR THIS TEST:

Six Trigger Assemblies are provided. The bolt stop releases have had the corner area removed.

If this design change is accepted, all trigger housing assemblies (RH and LH) could be assembled with rivets in the same direction. This would require fixturing costs and changeover time on both current production and automated production being developed under Project TI-FH1600.

Please also inform Jeff Lawrence of test results

-GUNS REQUIRED:-

Six

NOTE: NO firearms or parts will be tested in the Lab unless they are accompanied by a Work Request, and both are delivered to the Lab by the designer or engineer. All Work Requests are to be filled out in detail. No Exceptions.
