SERVICES SUPPLIED BY ENGINEERING DEPARTMENT

Attached you will find a recap of Sporting Goods' usage of the Engineering Department's Engineering Services Division. As you can see, the costs to Sporting Goods are significant. Engineering estimates are broken down into two broad categories: 1) ESD field personnel (\$150M); and 2) Engineering work requests (\$250M). These work requests are a controllable cost, and as such we should use prudent judgment in the use of these services.

Please take a few minutes to review the work performed by ESD opposite the value of the service provided and its related cost. Let's ensure that we can continue to justify the costs of these services supplied by Engineering opposite their value to Remington.

If your usage of ESD services for 1991 will be different from this year, please let me know so we can adjust our estimates for DUC's charges. If you have questions, please call me at Ducom 773-5312.
