REF.: MONTHLY REPORT FOR MAY1993

SAFETY, HEALTH AND HOUSEKEEPING:

- Site audit completed for month.
- Attended monthly Process Hazards Committee.
- Attended DuPont Process Hazards Review Seminar

PERSONNEL ISSUES:

- Nothing of note to report.

MAINTENANCE:

- The new Intensified Imager has been returned from Calif. after being replaced. The original imager had a problem of an "after image" and this has been corrected by replacement of the equipment under warrenty.
- The water shot catchers are in need of velding again and replacement of plates.
- We are still working on improving the air handling system in the water shot catcher system.

TEST PROGRAMS:

- Still waiting for a large enough sample (at least 200 guns) to be put in the warehouse so that the Trial & Pilot Test sample can be drawn for test.
- We are doing some testing on the M/522 to test a number of improvements.
- Our initial sample of M/700 Sendaros revealed the need for some improvements and we are waiting for a second sample to be submitted before approval of the T&P.
- Recoil evaluation testing is continuing.

PROJECTS:

- No significant changes to report.
